Power Mod™ and Uni-PAK

Introduction

Siemens Power Mod is a robust, flexible, and feature-rich line of modular metering designed to exceed today's market demands. Power Mod's exclusive QuickSystem has been proven to reduce labor by as much as 43% over comparable solutions while exclusive products such as the BFT Main Feed Thru family of mains, allow for lower material cost and incredible flexibility.

Power Mod is built upon service, quality, and flexibility:

Service: every order is made to order and shipped within a competitive lead time. This means all products arrive at the job site on time and together avoiding multiple shipment delays and confusion.

Quality: Power Mod has been tested to all applicable UL and ANSI standards as well as Siemens own rigorous internal specifications. Power Mod only offers 1200amp thru bussing.

All of this is delivered at a competitive lead time and price to other, lower rated products.

Flexibility: for Power Mod flexibility goes well beyond exclusive QuickSystem features. For Siemens this means allowing a variety of solutions to any application that can focus on labor savings, material savings, or both. This also means allowing the ability to configure Power Mod within the COMPAS configuration tool which allows the user to receive a PDF or DXF file of any custom line up.

Power Mod, when combined with Siemens broad line of load centers and exclusive feature arc fault circuit breakers, offers multiple solutions for any application utilizing the industry's broadest portfolio of multi-family metering solutions.

Power Mod

Introduction to QuickSystem™ Features

Contractor-focused features, robust quality, dependable service, and exclusive products define Siemens Power Mod. The new standard in multi family metering. QuickSystem showcases the key strengths of Power Mod through five labor saving features:

QuickConnect™

A Siemens exclusive feature, QuickConnect reduces bussing connections from many to one – ensuring a single reliable connection instead of multiple connections.

QuickTorque™

QuickTorque eliminates the need for time consuming torque readings. This breakaway nut provides a visual indicator of torque for the QuickConnect. When tightened, the outer head twists off at the proper torque for connection, leaving a single nut for future maintenance.

QuickBolt™

A Siemens exclusive feature, QuickBolt eliminates the requirement to line up mechanical connections – instead bolts remain retracted until the openings line up – allowing the bolts to protrude through automatically. Springs push the bolts through and provide positive pressure to keep bolts in place while wingnuts are attached and tightened.

QuickRoll™

A Siemens exclusive feature, QuickRoll eliminates typical metal brackets for mounting modules on the wall. Instead of metal scraping metal, QuickRoll allows the module to glide down the mounting rail via a durable nylon wheel inside a mounting bracket.

QuickPhase™

Each individual meter position can be phased independently according to the users needs. QuickPhase allows the user the ultimate flexibility to adjust to each individual application. Some exclusions apply.

Power Mod

Introduction to Basic Features

Siemens Modular Metering includes an assortment of module types that can be configured to meet a wide range of residential and commercial group metering applications.

Siemens modular metering provides for single phase, three wire, 120/240V AC; three phase, four wire 120/208Y applications, and three phase in/out, 240 Volt max delta systems. The cross bus that connects devices is aluminum and has a 1200 Amp continuous current rating.

A typical application requires a main device module and one or more residential or commercial meter stacks. Depending on the application additional modules such as a pullbox, tap box, or a spacer may be required.

All of the enclosures are made with G90 galvanized steel and painted with ANSI 61 paint. All swing latches and rivets are made with stainless steel.

QuickConnect™

The time-saving QuickConnect™ (QC) provides a single connection for phase, neutral, and ground – all tightened by a single torque-indicating nut. Factory installed QuickBolt™ spring loaded bolts are located just above and below the QC opening to compress the surrounding gaskets together to form a water-tight seal. For extra stability additional nuts and bolts above and below QuickBolts are included as a means of physically joining the meter stacks together both above and below the QC opening.

Neutral and Ground Provisions

All grounds and neutrals may be relocated toward the top or bottom of the enclosure depending on where the cables exit.

Tenant Breaker Provisions

Each 225 Amp meter socket has a provision for a 2-pole 225A max plug-in type QS circuit breaker. The compact QS breaker fits in two inches and reduces enclosure size limited total mounting space required. Single right hand bend wiring saves time and wire. Insert a 125A QP into a 225 Amp QS slot without conversion kits or filler plates. Generous gutter space allows for wires to exit the top, bottom, or back of the meter module.

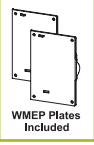

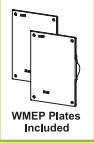

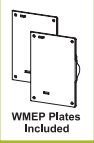

WMM Module factory phasing is as follows:

- 2 Gang: AB, BC
- 3 Gang: AB, BC, AC
- 4 Gang: AB, BC, AC, AB
- 5 Gang: AB, BC, AC, AB, BC
- 6 Gang: AB, BC, AC, AB, BC, AC

Any position can be adjusted to any phase in the field.

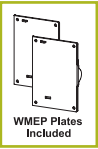

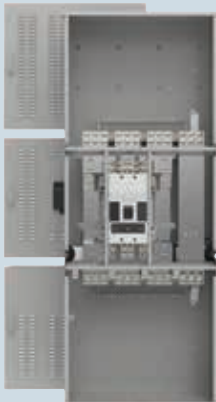

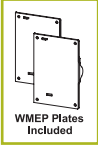

Power Mod

Overview of Families

	<p>WB – Standard Circuit Breaker Mains</p> <p>Standard breaker modules (type WB) offer a balance between functionality, feature, and size constraints.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Compression lug landing pads (field install up to 1200A, standard feature up to 2000A) ■ Combination overhead and underground feed up to 1200A, dedicated overhead or under ground feed up to 2000A ■ 750kcmil AL wire options ■ 65K AIC standard, 100K AIC available for all models ■ Removable blank bottom endwall ■ Externally accessible breaker handle with padlock capability ■ Broad ampacity ratings up to 2000A with non-standard amperages available (such as 700, 900, etc.) ■ Field installable shunt trips 	<p>Standard Circuit Breaker Mains quick reference</p> <ul style="list-style-type: none"> ■ 200-2000A ■ 1200A thru-bus rating ■ UL Standard # 67 ■ UL file # E27100 ■ AIC rating (65k and 100k) ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three phase 240V AC max ■ NEMA 3R rated 
	<p>WEB – Circuit Breaker-Pullbox Combinations</p> <p>EUSERC - compliant breaker - pullbox combination modules (type WEB) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Factory installed NEMA II studs ■ 750 kcmil AL wire options ■ 65K AIC standard, 100K AIC available for all models ■ Removable blank bottom endwall ■ Externally accessible breaker handle with padlock capability ■ Field installable shunt trips ■ Large removable ground wire trough with generous space for grounding conductors 	<p>Circuit Breaker-Pullbox Combo quick reference</p> <ul style="list-style-type: none"> ■ 200-1200A ■ 1200A thru-bus rating ■ UL standard # 67 ■ UL file # E27100 ■ AIC rating (65k and 100k) ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC Max – Three phase 240V AC Max ■ NEMA 3R rated ■ EUSERC drawing number 347 
	<p>WXB – Cross Bus Main</p> <p>The WXB family of main breaker devices features incoming and out-going thru bus connections (no incoming lugs). This patented design allows the user to utilize the WXB family to connect to Siemens Sentron Busway or connect to a tap box (or other main) to lower the overall ampacity of the service disconnect. In addition users can now utilize incoming tap boxes to split the service between multiple mains. This can save the end-user on the material cost of the meter bank. Please see the applications pages for more information.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Incoming and Outgoing Power Mod thru bus ■ 65K AIC standard, 100K AIC available for all models ■ Broad ampacity ratings up to 1200A with non-standard amperages available (such as 700, 900, etc...) ■ Field installable shunt trip 	<p>Cross Bus Mains quick reference</p> <ul style="list-style-type: none"> ■ 400-1200A ■ 1200A thru-bus rating ■ UL Standard #67 ■ UL file # E27100 ■ AIC rating (65k and 100k) ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three Phase 240V AC max ■ NEMA 3R (outdoor)  

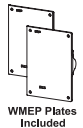

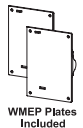

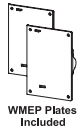

Power Mod

Overview of Families

	<p>WBT - Feed Thru Tap Box with Horizontal Bus Breaker</p> <p>Feed thru tap box and breaker module (type WBT) offers the ability to pull conductors in and out of the enclosure for rise cable or loop feed applications as well as a main breaker device utilizing an incoming and out-going thru bus connections (including incoming lugs). This patented design allows the user to utilize the WBT family to connect to Siemens Sentron Busway.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Incoming and Outgoing Power Mod thru bus ■ Standard compression lug capability ■ 65K AIC standard, 100K AIC available for all models ■ Broad ampacity ratings up to 1200 Amps 	<p>Feed Thru Tap Box with Breaker quick reference</p> <ul style="list-style-type: none"> ■ 200-1200A (breaker) ■ 400-2400A (feed thru) ■ 1200 thru-bus rating ■ UL Standard #67 ■ UL file #E27100 ■ AIC rating (65K and 100K) ■ Voltage: <ul style="list-style-type: none"> – Three Phase 240V AC max ■ NEMA 3R rated 
	<p>BFT - Main Feed Thru</p> <p>Main feed thru (type BFT) breaker modules has the ability to isolate power to side-mounted modules just like any other Power Mod main breaker module, but also contains feed-through lugs that can be used to supply and isolate power vertically to downstream group metering line ups.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Incoming and Outgoing Power Mod thru bus ■ Standard compression lug capability ■ 65K AIC standard, 100K AIC available for all models ■ Main breaker with broad ampacity ratings from 1200A to 2000A 	<p>Main Feed Thru quick reference</p> <ul style="list-style-type: none"> ■ 1200 - 2000A main bus rating ■ 1200A Horizontal bus rating ■ UL Standard #67, file #E27100 ■ AIC rating (65K & 100K) ■ Voltage: 240V AC max ■ Available in single and three phase ■ NEMA 1 (Indoor) ■ Bottom feed only ■ All units come with no hubs ■ EUSERC drawing number 347 (EUSERC applies to 1200A unit only) 
	<p>WS - Standard Switch Mains</p> <p>Standard switch modules (type WS) are designed for flexibility, space savings, and durability.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Standard compression lug capability ■ Invertibility: 400-800 Amp devices can be rotated to accommodate the desired incoming feed direction ■ 750 kcmil AL wire options for most models ■ 100K AIC standard for all models ■ Class T fuse provisions ■ Broad ampacity ratings up to 1200 Amps 	<p>Standard Switch Mains quick reference</p> <ul style="list-style-type: none"> ■ 400-1200A ■ 1200A thru-bus rating ■ UL Standard # 98 ■ UL file #E25506 ■ AIC rating (100k AIC) ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three phase 240V AC max ■ NEMA 3R rated 
	<p>WES - Switch-Pullbox Combinations</p> <p>EUSERC - compliant switch-pullbox combination modules (type WES) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Factory installed NEMA II studs ■ Broad ampacity ratings up to 1200 Amps ■ 750kcmil AL wire options ■ 100K AIC standard for all models ■ Removable blank bottom endwall ■ Class T fuse provisions ■ Extra ground lugs in each device 	<p>Switch-Pullbox Combo quick reference</p> <ul style="list-style-type: none"> ■ 400-1200A ■ 1200A thru-bus rating ■ UL standard # 98 ■ UL file # E25506 ■ AIC Rating (100k AIC) ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three phase 240V AC max ■ NEMA 3R rated ■ EUSERC drawing numbers 315, 343, and 347 

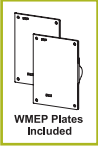

Power Mod

Overview of Families

	<p>WXS - Cross Bus Switch</p> <p>The WXS family of switches offers a standardized means of connecting Siemens Sentron busway to Power Mod for mid and high-rise applications. The Sentron Busway is connected via the TapStack which converts Sentron busway connections over to Power Mod thru bus connections. This enables the user to connect to Power Mod in as little as 9" of wall space.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Fast connection of end-feed busway to Power Mod meter banks ■ Class T fuse provisions ■ 100K AIC standard for all models 	<p>Pull Box quick reference</p> <ul style="list-style-type: none"> ■ 400,600,800A ■ 1200 Amp thru-bus rating ■ UL Standard #98 ■ UL file # E25506 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three Phase 240V AC max ■ NEMA 3R rated <div data-bbox="1377 279 1474 426">  <p>WMEP Plates Included</p> </div> <div data-bbox="1377 447 1474 594">  <p>QuickConnect™ Included</p> </div>
	<p>WTB - Standard Tap boxes</p> <p>Standard tap box modules (type WTB) are designed for versatility, space savings, and flexibility.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Standard compression lug capability ■ Invertibility: devices can be rotated to accommodate the desired incoming feed direction ■ 750 kcmil AL wire options for most models ■ 100K AIC standard for all models ■ Broad ampacity ratings from 400 to 2400 Amps ■ Line and load capability- service entrance and sub-feed rated 	<p>Standard Tap box quick reference</p> <ul style="list-style-type: none"> ■ 400-2400A ■ 1200A thru-bus rating ■ UL Standard # 67 ■ UL file # E27100 ■ AIC rating (100K AIC) ■ Voltage <ul style="list-style-type: none"> - Single phase 120/240V AC max - Three phase 240V AC max ■ All swing latches and rivets are stainless steel. ■ NEMA 3R rated <div data-bbox="1377 804 1474 951">  <p>WMEP Plates Included</p> </div>
<div data-bbox="459 1220 1190 1266">  <p>Restrictions for 1600-2400A type WTB Power Mod Tap Boxes:</p>  </div> <p>When the 1600, 2000, or 2400A tap boxes are used as service entrance equipment (fed directly from utility transformer) or when the supply originates from a Class L fuse or Siemens WL circuit breaker there are restrictions on the use of an additional down-stream (thru-bus connected) WTB, WTB, WET, or WT type Power Mod tap boxes. In these instances a type "WXB" module must be used as protection for the down- stream tap box. box (placed between the incoming WTB tap box and the downstream outgoing tap box). This restriction does NOT apply if the tap box is fed from a Siemens Sentron or VL series molded case circuit breaker. Note that the maximum amperage for a Siemens Sentron circuit breaker is 2,000A.</p>		
	<p>WET - Tap box - Pullbox Combinations</p> <p>EUSERC - compliant Tap box-Pullbox Combination modules (type WET) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Standard compression lug capability ■ 750 kcmil AL wire options for most models ■ 100K AIC standard for all models ■ Broad ampacity ratings from 400 to 1200 Amps ■ Removable bottom endwall 	<p>Tap box - Pullbox Combination quick reference</p> <ul style="list-style-type: none"> ■ 400-1200A ■ 1200 Amp thru-bus rating ■ UL Standard #'s 67 ■ UL file # E27100 ■ AIC Rating (100k) ■ Voltage <ul style="list-style-type: none"> - Single phase 120/240V AC max - Three phase 240V AC max ■ All swing latches and rivets are stainless steel. ■ NEMA 3R rated ■ EUSERC drawing numbers 343, 343A, 347 (Pullbox) <div data-bbox="1377 1501 1474 1648">  <p>WMEP Plates Included</p> </div>

Power Mod

Overview of Families

	<p>Feed-thru tap boxes (type WT) offer the ability to pull conductors in and out of the enclosure for riser cable or loop feed applications.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Standard compression lug capability ■ 750kcmil Al wire options ■ 100k AIC standard ■ Removable bottom endwall ■ Broad ampacity ratings from 400 to 2400 Amps 	<ul style="list-style-type: none"> ■ 400-2400A ■ 1200A thru bus ■ UL Standard #67 ■ UL file no. 	<p>WML – Lever Bypass Meter Stacks</p> <p>Commercial Lever Bypass meter stacks (type WML) are designed to meet the requirements of those utilities specifying lever bypass meter sockets for residential and commercial applications.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ High-quality, time-proven Talon HQ sockets ■ A line of 3-phase 100 Amp meter stacks to minimize tenant main cost ■ Removable back knockout plate to facilitate wiring ■ 225 Amp capability in single and three phase designs ■ Up to 4 positions with 225 Amp tenant mains, up to 2 positions with 400 Amp tenant mains ■ Ease of wiring – tenant mains require only a single bend 	<p>Lever Bypass quick reference</p> <ul style="list-style-type: none"> ■ 100A/225A 1-4 position ■ 400A 1-2 position ■ 1200A thru-bus rating ■ UL Standard # UL67 ■ UL file # E27100 ■ AIC rating (25K, 65K and 100K) ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three in single phase out 208Y/120V AC – Three Phase 240V AC max ■ All swing latches and rivets are stainless steel. ■ Outdoor = NEMA 3R rated ■ Indoor = NEMA 1 rated 

	<p>WML - Fusible Switch Lever Bypass Meter stacks</p> <p>This Commercial Lever Bypass meter stacks (type WML) feature a 400 Amp - class T - fusible pull out assembly. Features include:</p> <ul style="list-style-type: none"> ■ High-quality, time proven Talon HQ sockets ■ Removable back knockout plate to facilitate wiring ■ Available in single and three phases designs ■ Single position with 400 Amp tenant main ■ Ease of wiring 	<p>Lever Bypass With Fusible Switch Quick Reference:</p> <ul style="list-style-type: none"> ■ 400A 1 position ■ 1200A thru bus rating ■ UL Standard #UL67 ■ UL file #E27100 ■ AIC rating 65KAIC ■ Voltage: <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three phase in, single phase out 208Y/120V AC – Three Phase 240V AC max ■ Outdoor= NEMA 3R rated ■ Indoor= NEMA 1 rated 
	<p>WMLZ/ WMLZF – Fusible Residential Lever Bypass Meter Stacks</p> <p>The WMLZ and WMLZF lever bypass meter stacks are designed to allow the use of class T (400 Amp max) fuses ahead of all meter positions where the local serving utility may require it. WMLZF stacks feature a 400 Amp fusible pull out assembly which connects to a secondary 400 Amp thru bus that can feed downstream meter stacks. The WMLZ stacks include the secondary thru bus that can connect from the WMLZF meter stacks. The standard Power Mod 1200amp thru bus "passes thru" to feed downstream modules – the meter sockets in WMLZ and WMLZF do NOT connect directly to the 1200 Amp thru bus – only to the 400 Amp thru bus.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ High-quality, time proven Talon HQ sockets ■ 125 Amp capability for 3-phase in/ single-phase out ■ 3 to 6 positions in both the fused stack and the expansion stack ■ 400 Amp class T fusible-pullout in WMLZF stacks ■ Secondary 400 Amp thru bus to supply power to downstream sockets ■ Ease of wiring – tenant mains require only a single bend ■ Preconfigures and wired. 	<p>Xcel Residential Lever Bypass Quick Reference:</p> <ul style="list-style-type: none"> ■ 125A 3-6 position ■ 1200A thru bus rating ■ 400A secondary thru-bus rating and vertical bus rating ■ UL Standard #UL67 ■ UL file #E27100 ■ AIC rating (100K) ■ Voltage <ul style="list-style-type: none"> – Three phase in, single phase out 208Y/120V AC ■ Outdoor = NEMA 3R rated ■ Indoor = NEMA 1 rated 
	<p>WMT – Test Block Bypass Meter Stacks</p> <p>Commercial Test Block Bypass Meter Stacks (type WMT) are designed to meet the requirements of those utilities specifying test block bypass meter sockets for commercial applications in areas subscribing to the EUSERC standards.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ High-quality, time-proven Siemens SMM switchboard meter socket ■ Removable back knockout plate to facilitate wiring ■ 225 Amp capability in single and three phase designs ■ Up to 3 positions with 225 Amp tenant mains ■ Wiring flexibility - tenant mains require only a single bend ■ Three phase input, single phase output modules ■ In line wiring: side knockouts allow wiring for adjacent units to pass through 	<p>Test Block Bypass quick reference</p> <ul style="list-style-type: none"> ■ 225A 1-3 positions ■ 1200A thru-bus rating ■ UL Standard #'s 67 ■ UL file # E27100 ■ AIC Rating (100k) ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – 3 phase in single phase out 120Y/208V AC max – Three phase 240V AC max ■ Outdoor= NEMA 3R rated ■ Indoor= NEMA 1 rated ■ EUSERC drawing numbers 312 and 353 

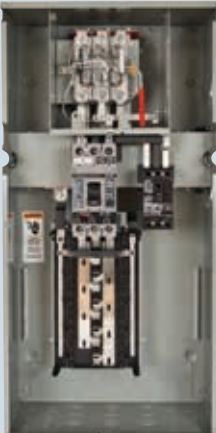

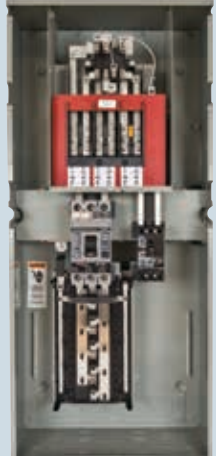

Power Mod

Overview of Families

	<p>WSPD – Integral surge protection device for multi-family applications</p> <p>Surge protection modules for Power Mod (type WSPD) are thru-bus connected modules that allow the user to view surge status as well as access the SPD control panel without breaking the utility seal on the enclosure. An optional breaker disconnect is available to enable the end user to replace the SPD (surge protection device) without having to disconnect utility power to the Power Mod installation.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ 100,200,300,400,500kA ratings available ■ External, vandal resistant and lockable clear cover over SPD control panel ■ Single phase thru bus and three phase thru bus ■ Optional breaker disconnect that opens phase and neutral to make SPD replacement quick and easy 	<p>Surge Module quick reference</p> <ul style="list-style-type: none"> ■ 100-500kA ratings available ■ 1200A thru-bus rating ■ UL Standard #67 ■ UL file # E27100 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three Phase 240V AC max ■ NEMA 3R rated 
	<p>WMK – K-Base Meter Stacks</p> <p>Commercial K-Base Meter Stacks (type WMK) are designed to meet the requirements of those utilities specifying bolt-in meter sockets for 400 and 600 Amp residential and commercial applications.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Exclusive Talon K4, K5, and K7 meter sockets ■ 1 position K4, K5, K7 modules with 400 and 600 Amp tenant mains ■ 2 position K7 module with 400 Amp tenant main ■ Space saving design 	<p>K-Base quick reference</p> <ul style="list-style-type: none"> ■ 400A and 600A 1-2 positions ■ 1200A Thru bus-rating ■ UL Standard # 67 ■ UL file # E27100 ■ AIC Rating (25k) ■ Voltage <ul style="list-style-type: none"> – Single Phase 120/240V AC Max – Three In Single Phase Out 208Y/120V AC – Three Phase 240V AC Max ■ NEMA 3R rated 
	<p>WMMB – auxiliary pull boxes for use with WB, WTB, and WS Power Mod modules</p> <p>Auxiliary pull boxes are used in cases where WEB, WES, or WET modules were not or cannot be used, but the user still needs to comply with the EUSERC standard. These modules feature incoming NEMA II stud pattern lugs for underground feed and allow the user to pull wire from the lug landing in the pull box thru a 6" knockout and into: 400-1200A WB, WTB and 400-800A WS modules. Note this family does NOT have any thru bus.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ 6" side opening (right or left) with available gasket to help mitigate wire insulation damage ■ EUSERC compliant incoming pull section 	<p>Pull Box quick reference</p> <ul style="list-style-type: none"> ■ 400A, 800A,1200A ■ UL Standard #67 ■ UL file # E27100 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three Phase 240V AC max ■ NEMA 3R rated

Power Mod

Overview of Families

	<p>WC – Residential meter socket with load center distribution panel</p> <p>The meter-load center combination offered by the WC series is unique and exclusive to the Siemens Power Mod family. This product offers the ability to combine house power applications with a meter socket thereby reducing material (pipe and wire) and installation time (separate load center or panel board).</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Single phase thru bus and three phase thru bus ■ 20 space - 40 circuit interior for single phase out put devices ■ 24 space - 42 circuit interior for three phase out put devices ■ Copper bus PL Series Siemens load center interior ■ Dual neutral and ground provisions with Siemens patented Instawire technology ■ Optional subfeed breaker for elevator applications ■ 250 Amp overall device rating 	<p>WC House Power Panel quick reference:</p> <ul style="list-style-type: none"> ■ 250A, 1 position ■ 1200 Amp thru-bus rating ■ UL Standard #67 ■ UL Standard #414 ■ UL file # E27100 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three in single phase out 208Y120V AC – Three Phase 240V AC max ■ NEMA 3R rated ■ Copper load center bus bars ■ 125A MAX subfeed breaker- factory installed (type HED4) ■ 225A MAX main breaker- factory installed (type HFD6) 
	<p>WCL – Commercial Lever Bypass meter socket with load center distribution panel</p> <p>The meter-load center combination offered by the WCL series is unique and exclusive to the Siemens Power Mod family. This product offers the ability to combine house power applications with a meter socket thereby reducing material (pipe and wire) and installation time (separate load center or panel board). WCL modules feature the Talon HQ lever bypass for those utilities that specify lever bypass for residential and commercial applications.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Single phase thru bus and three phase thru bus ■ 20 space - 40 circuit interior for single phase out put devices ■ 24 space - 42 circuit interior for three phase out put devices ■ Copper bus PL Series Siemens load center interior ■ Dual neutral and ground provisions with Siemens patented Instawire technology ■ Optional subfeed breaker for elevator applications ■ 250 Amp overall device rating 	<p>WCL House Power Panel quick reference:</p> <ul style="list-style-type: none"> ■ 250A, 1 position ■ 1200A thru-bus rating ■ UL Standard #67 ■ UL Standard #414 ■ UL file # E27100 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three in single phase out 208Y120V AC – Three Phase 240V AC max ■ NEMA 3R rated ■ Copper load center bus bars ■ 125A MAX subfeed breaker- factory installed (type HED4) ■ 225A MAX main breaker- factory installed (type HFD6) 
	<p>WCT – Commercial Test Block Bypass meter socket with load center distribution panel</p> <p>The meter-load center combination offered by the WCT series is unique and exclusive to the Siemens Power Mod family. This product offers the ability to combine house power applications with a meter socket thereby reducing material (pipe and wire) and installation time (separate load center or panel board). WCT modules feature a test block bypass socket for utilities subscribing to the EUSERC standard.</p> <p>Features include:</p> <ul style="list-style-type: none"> ■ Single phase thru bus and three phase thru bus ■ 20 space - 40 circuit interior for single phase out put devices ■ 24 space - 42 circuit interior for three phase out put devices ■ Copper bus PL Series Siemens load center interior ■ Dual neutral and ground provisions with Siemens patented Instawire technology ■ Optional subfeed breaker for elevator applications ■ 250amp overall device rating 	<p>WCT House Power Panel quick reference:</p> <ul style="list-style-type: none"> ■ 250A, 1 position ■ 1200A thru-bus rating ■ UL Standard #67 ■ UL Standard #414 ■ UL file # E27100 ■ AIC rating: 100K ■ Voltage <ul style="list-style-type: none"> – Single phase 120/240V AC max – Three in single phase out 208Y120V AC – Three Phase 240V AC max ■ NEMA 3R rated ■ Copper load center bus bars ■ 125A MAX subfeed breaker- factory installed (type HED4) ■ 225A MAX main breaker- factory installed (type HFD6) 

Power Mod

Introduction

The breadth of the Power Mod product line is unmatched in the industry today. The available options result in many different ways to configure the same project with some solutions focusing on material cost and other solutions that create the opportunity for labor savings. The following pages contain examples and tips for using Power Mod in common multi-family metering applications including, but not limited to high rise buildings, mixed use, and garden style apartment complexes.

The following items are configuration tips and rules to keep in mind:

Ampacity and Bussing

Configurations are limited by the continuous current ratings for the main device (service entrance) and the thru bus. The Power Mod thru bus is always rated for 1200A from the factory. Siemens does not offer low 800A rated thru bus. All thru bus within the same meter bank must be single phase or three phase. Single and three phase thru bus cannot be mixed within the same meter bank.

Connections

A QuickConnect is required for each thru bus connection and is supplied with all WMM, WML, WMT, WC, WCL, WCT, WSPD, WMK, WXB, WXS, BE, WSP and WELB modules. The QuickConnect houses all phase, neutral, ground/bonding connections between Power Mod modules.

Utility Requirements

Utilities have varying requirements for equipment height, cover types, and bypass types. Therefore, utility acceptance should be verified prior to installation of any equipment. The COMPAS configuration tool can be utilized by any authorized Siemens sales or distributor representative to show critical dimensions of any installation.

Service Entrance Modules and Requirements

- In group metering applications, breaker mains larger than 1200A have been used for years as center-fed devices where the load out of either side is 1200A or lower. This practice is acceptable because the products are tested as a complete system in accordance with UL standards. When installed per these instructions, the Panelboard will meet the UL listing of the product and will be consistent with proven industry standard practice.
- EUSERC-compliant service entrance modules (families WEB, WES, WET) are underground feed only and offer a wider range of lug options due to the larger enclosure size. These devices are also setup for compression lug installations from the factory.
- Tap boxes (families WTB, WT, WET) provide a direct connection to the thru bus and do not provide any overcurrent protection. These families should never be used to feed other main devices that have incoming lugs (families WB, WEB, WS, WES). A tap box CAN be used with the WXB

and WXS cross bus main families. All tap box families can be used as a service entrance point or a load side feed for remote equipment. An additional QuickConnect must be ordered separately when using a tap box on the load side. The WTB family features invertibility on 400 –1600A models. Each item from this family includes two sets of QuickBolts. The eventual left side must be removed prior to installation.

- WB service entrance breaker modules: 200 thru 1200A modules are combination feed allowing service entrance conductors to enter the top or bottom of the enclosure. 1400-1600amp WB modules come in top or bottom feed (combination feed is not available). 2000A WB modules are available in dedicated bottom feed or combination feed configurations.
- WS service entrance switch modules: 400 to 800A modules are invertible for top or bottom feed. Each includes two sets of QuickBolts. The eventual left side must be removed prior to installation. 1200A WS modules are bottom feed only and utilize a molded case switch (looks like a breaker) for the switching mechanism.

Spacing Requirements

A spacer is commonly required between a meter stack and a service entrance module. This is usually due to the need to have a minimum distance (left or right) from the meter to any obstruction. TIP: when the service entrance main is on the LEFT and you need a 125A tenant main WMM stack use a 225A WMM meter stack instead. The extra width of the 225A stack will provide 10" of clearance from the main and, since you can use a standard Q2100 or Q2125 in the stack, the cost increase from 125A to 225A is still less than adding a spacer (type WSP). This also saves the installation labor of the spacer.

Breaker Provisions

A tenant breaker must be ordered separately for each tenant position or configured as factory installed within the COMPAS configuration tool. Blank filler plates are not available thus un-used positions must have a breaker installed or the access cover must be locked.

Space Savings

Utilize the WC-WCL-WCT families to save space. These devices allow for consolidating the typical setup of a meter stack and separate panel into a single device if the application. This allows for less wall space, increased material savings, and a lower install cost. Please see the configurations on the following pages for examples.

Material Savings

Utilize the WXB cross bus mains to lower your overall material cost. When a large ampacity main is needed (1200A or above) utilizing a tap box and a WXB main can lower the overall cost by eliminating costly large frame breakers from the installation. As shown in figures 3 and 4 the installation does require more wall space, but the overall dollars are lower.

Power Mod

Applications: Typical Configurations

Figure 1

Incoming Service: 1600 Amps

Details: This installation requires a center fed main because the incoming service is over the thru bus rating of 1200 Amps.

Takeaway: Any main or tapbox over 1200A must be center-fed so not to overload the bus.

Figure 2

Incoming Service: 1200 Amps

Details: This installation is shown as end feed from the left, but could be right or center fed as well since the main service does not exceed 1200 Amps. Some areas of the US have maintenance space requirements regarding meter sockets. In these areas a spacer (family WSP) could be placed between the WB module and the WMM stack labeled "Position A" to give a technician space to work on the watt hour meter. Another option would be to utilize a 225 Amp WMM stack in position A thereby eliminating the need for the spacer and lowering the overall cost.

Power Mod

Applications: WXB Family of Cross Bus Mains

Figure 3

Incoming Service: 1600 Amps

Details: The installation above has a 1600 Amp 3 phase WB main (WB31600B) which is feeding WML321225RJ stacks to the left and WMM42125RJ stacks to the right. Overall it has a width of 130.7" and has a list price of \$15,366.^①

Functionally, these two lineups are accomplishing the same task using different modules

Figure 4

Incoming Service: 1600 Amps

Details: This installation can meet the same application as Figure 3 above, but replaces the 1600 Amp WB main with a tap box (WT31600PU in this case). The service disconnects are labeled #1 and #2 above. By dividing the incoming current into 2 mains- even though more modules were added- the overall list price DROPS to \$13,982. Width grows by 31", BUT there is now a 9% savings on material! ^①

^① Pricing subject to change without notice.

Power Mod

Applications: WXB Family of Cross Bus Mains

Figure 5

Incoming Service: 1600 Amps

Details: The installation above has a 1600 Amp 3 phase WB main (WB31600B) which is feeding a WML321225RJ stack to the left and WMM42125RJ stacks to the right.

Figure 6

Incoming Service: 1600 Amps

Details: This installation can meet the same application as Figure 5 above, but replaces the 1600amp WB main with a tap box (WT31600PU in this case). The right side utilizes the new WXB31200N cross bus main. The left side works off of the six disconnect rule. In removing the 1600 Amp WB and adding the WXB the width grew by 8", but the list price drops by over 20% offering a tremendous savings on material. Another option would be to utilize a WB main breaker to feed a remotely mounted CT cabinet. The overall application remains the same- taking the large 1600amp incoming service and splitting it between 2 main disconnects.

Power Mod

Applications: WC-WCT-WCL House Power Modules

Figure 9

Incoming Service: 1200 Amps

Details: The installation above has a 1200 Amp 3 phase WB main (WB31200C) feeding WMM residential stacks and a WML13225RJ (1) position commercial meter stack. The WML is feeding a P1 lighting panel approximately 2' away. The P1 is the house power panel.

Figure 10

Incoming Service: 1200 Amps

Details: This is the same application as figure 7 shown above, however the WCL house power module now takes the place of both the WML and the P1. The WCL is rated for up to 250A and can accommodate 40 circuits + 1 subfeed breaker of up to 125A. The WCL, in this application, saves over 4 FEET of wall space plus lowers the material cost for the application by 15%! The WCL in this case could also be a WCT or WC. This application simplifies smaller house power needs such as elevators, parking lot lighting, common area lighting, or club houses.

Power Mod

Applications: WTB Tap Boxes 1600 – 2400 Amps (when used with load side tap boxes WT or WTB)

Figure
14

This application shown **IS** allowed because the tap box has circuit protection via the WXB main.

- Siemens Type WL Circuit Breaker
- Class L fuse
- Service Entrance (direct from utility transformer)^①

Figure
15

The application shown is **NOT** allowed. A down stream WT or WTB tap box requires circuit protection in the form of a WXB Main.

- Siemens Type WL Circuit Breaker
- Class L fuse
- Service Entrance (direct from utility transformer)^①

^① Drawings are for illustrative purposes only.

Power Mod

Applications: WT Tap Boxes 1600 – 2400 Amps

Figure 16

- Siemens Sentron or VL MCCB

Either of the applications shown are acceptable due to the presence of the VL or Sentron MCBB

Figure 18

- Service Entrance (direct from utility transformer)^①
- Siemens Type WL circuit breaker

① Drawings are for illustrative purposes only.

Figure 17

The application shown is **NOT** allowed. A down stream WT or WTB tap box requires circuit protection in the form of a WXB Main.

- Class L Fuse

This application shown **IS** allowed because the tap box has circuit protection via the WXB main.

A type WL circuit breaker cannot be used to feed a WT series tap box. Additionally WT tap boxes are not rated for service entrance.

Power Mod

Applications: Bus Duct Connections

Busway application

Siemens Power Mod offers an efficient and standardized means of connecting Sentron Busway to Power Mod utilizing the TapStack module. This module connects to a joint in the busway and converts the bus structure over to that of the Power Mod thru bus in only nine inches.

TapStacks are configured, priced, built, and shipped with the Sentron Busway. They require an additional QuickConnect coupler and are for indoor use on end-feed applications. TapStacks can connect to any Power Mod thru bus.

Options for the user are:

1. Direct Connection: in this option (below) the connection is made directly to any meter stack family. This application is for use when the service disconnect is located at the beginning of the busway.

2. Connection to a service disconnect: in this option a connection is made to either a WXB cross bus main or a WXS switch main. Please note that ANY other mains (WB, WEB, WS, WES) cannot act as a service disconnect for downstream meter stacks. The WB, WEB, WS, WES mains CAN be used as tenant mains on the load-side of a service disconnect for use in feeding large remote loads such as a CT cabinet. WXB mains are available up to 1200A and WXS mains are available up to 800A. Both families have 100K AIC options for all models.

3. Connection to a load-side main: In applications where branch circuit monitoring is used in lieu of Power Mod a tap stack plus Power Mod main (WB, WS) can be used where the installer cables out of the main over to a distribution panel (Siemens P3, P4, and P5 panel types). This essentially replaces a bus plug function.

For Center feed bus duct application please contact your Siemens representative.

Critical and recommended dimensions for Sentron Busway to Power Mod connections

Tap Stack Module

Warning

Do not connect the Power Mod NEMA 1 corner units (BE) directly to busway; always use a WELB in its place or use another module as an intermediary between the two.

Power Mod

Applications: Examples of Busway configurations

Figure 11

Example of WXB or WXS cross bus mains protecting stacks being fed by busway

Figure 12

Figure 13

Example of stacks fed by busway tapstack with an upstream main

Figure 14

Example of stacks being fed by a meter center cubicle built inline with busway

Figure 15

A WB main can be used to back-feed panel board off of busway

Please Note:

- There typically will be an offset off of the wall coming off of busway
- Strut or artificial walls can be used to mount power mod when fed by busway
- When fed by a cubicle tapstacks are not necessary
- Tapstacks are busway products and must be used when connecting Power Mod products to busway when a cubicle is not used
- Tapstacks and cubicles transpose busway phasing to match power mod phasing

Power Mod

Type WB Standard and Skinny Circuit Breaker Mains

Standard and Skinny Circuit Breaker Mains

Standard breaker modules (type WB) offer a balance between functionality, feature, and size constraints.

Features include:

- QuickSystem™ features
- Compression lug landing pads (field install up to 1200 Amps, standard feature up to 2000 Amps)
- Standard Mains offer combination overhead and underground feed up to 1200 Amps as well as dedicated overhead or underground feed up to 2000 Amps
- Skinny Mains offer dedicated feed options, overhead or underground, in modules 200-1200 Amps
- 750kcmil AL wire options
- 65K AIC standard, 100K AIC available for all models
- Removable blank bottom endwall
- Externally accessible breaker handle with padlock capability
- Broad ampacity ratings up to 2000 Amps with non-standard amperages available (such as 700, 900, etc.)
- Field installable shunt trips
- DAS blue light models available in amperages of 1200-1600

Standard and Skinny Circuit Breaker Mains Quick Reference

- 200-2000A module rating
- 1200A thru-bus rating
- UL Standard # UL67
- UL file # E27100
- AIC rating (65k and 100k)
- Voltage:
 - Single phase 120/240V AC max
 - Three phase 240V AC max
- All swing latches and rivets are stainless steel
- NEMA 3R rated
- Custom options now available.
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.

Power Mod

Type WB Standard Circuit Breaker Mains

Suitable for use as service equipment. Certain conditions may apply. See wiring diagram for details.

Lugs are NOT included on 1400A-2000A standard breaker main modules and must be ordered separately.

Refer to pages 92-93 for lug size options.

① Dimensions shown are representative of outside box dimensions and do not include allowances for mounting bumps, endwalls, covers, hubs, or hardware protrusions. Dimensions are subject to change.

② Additional lead time required. Contact sales office for details.

③ 100k and non-standard amperage modules.

④ Factory installed lugs standard on 200-1200A standard breaker main modules. Additional lug kit options available for 750 conductor size. Field installable compression lug landing pad also available. NEMA II Stud Pattern compression lugs must be installed by user or utility. Lugs NOT included on 1400A-2000A standard breaker main modules and must be ordered separately.

⑤ 1200 amp maximum feed per side-must be used as a center fed main.

⑥ All breakers have a non-interchangeable trip unit.

Power Mod

Type WB Standard Circuit Breaker Mains

Suitable for use as service equipment. Certain conditions may apply. See wiring diagram for details.

Lugs are NOT included on 1400A-2000A standard breaker main modules and must be ordered separately.

Refer to pages 92-93 for lug size options.

① Dimensions shown are representative of outside box dimensions and do not include allowances for mounting bumps, endwalls, covers, hubs, or hardware protrusions. Dimensions are subject to change.

② Additional lead time required. Contact sales office for details. 100K and non-standard amperage modules.

③ Factory installed lugs standard on 200-1200A standard breaker main modules. Additional lug kit options available for 750 conductor size. Field installable compression lug landing pad also available. NEMA II Stud Pattern compression lugs must be installed by user or utility. Lugs NOT included on 1400A-2000A standard breaker main modules and must be ordered separately.

④ 1200 amp maximum feed per side-must be used as a center fed main.

⑤ All breakers have a non-interchangeable trip unit.

Power Mod

Type WB Skinny Circuit Breaker Mains with Dedicated Feed Direction

Suitable for use as service equipment. Certain conditions may apply. See wiring diagram for details.

Skinny Mains are narrower than standard WB mains because they require a predetermined dedicated feed direction; either top feed or bottom feed. This direction must be known prior to selecting the unit. If feed direction is unknown, use a combination feed unit from previous pages.

Power Mod

Type WEB Circuit Breaker – Pullbox Combinations

Circuit Breaker – Pullbox Combinations

EUSERC – compliant breaker – pullbox combination modules (type WEB) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.

Features include:

- QuickSystem™ features
- Factory installed NEMA II studs
- 750 kcmil AL wire options
- 65K AIC standard, 100K AIC available for all models
- Removable blank bottom endwall
- Externally accessible breaker handle with padlock capability
- Field installable shunt trips
- Large removable ground wire trough with generous space for grounding conductors
- DAS blue light models available in 1200 Amps

Circuit Breaker-Pullbox Combinations Quick Reference

- 200-1200A module rating
- 1200A thru-bus
- UL standard # UL67
- UL file # E27100
- AIC rating (65k and 100k)
- Voltage
 - Single phase 120/240V AC max
 - Three phase 240V AC max
- All swing latches and rivets are stainless steel
- NEMA 3R rated
- G90 galvanized steel
- ANSI 61 paint
- EUSERC drawing number 347
- Custom options available.

Power Mod

Type WXB Main Units

Cross Bus Main modules

Cross Bus Main modules (type WXB) offer two distinct functions: first they can be used to connect Siemens Sentron Busway to a Power Mod line-up. Second they can be utilized to offer lower service sdisconnect ampacities or unique configurations where an incoming tap box is preferred. See application pages for examples.

Features include:

- QuickSystem™ features
- Incoming and outgoing bus connections (right to left or left to right)
- Standardized connection points to Siemens Sentron Busway
- 65K AIC standard, 100K AIC available for all models
- Externally accessible breaker handle with padlock capability
- Broad ampacity ratings up to 1200 Amps with non-standard amperages available (such as 700, 900, etc.)
- Field installable shunt trips

Circuit Breaker-Pullbox Combinations Quick Reference

- 400-1200A module rating
- 1200A thru-bus rating
- UL Standard # UL67
- UL file # E27100

Power Mod

Type WBT Feed Thru Tap Box with Horizontal Bus Breaker

WBT - Feed Thru Tap Box with Breaker

The feed thru tap box with breaker (type WBT) offers the ability to pull conductors in and out of the enclosure for rise cable or loop feed applications as well as a main breaker device utilizing an incoming and out-going thru bus connections (including incoming lugs). In addition users don't have to utilize any additional tap boxes as lugs are already included in the units. This can save the end-user on the material cost of the meter bank. Please see the applications pages for more information.

Features include:

- QuickSystem™ features
- Incoming and Outgoing Power Mod thru bus
- Standard compression lug capability
- 65K AIC standard, 100K AIC available for all models
- Broad ampacity ratings from 1200-2000 Amps
- Field installable shunt trip

Feed Thru Tap Box with Breaker Quick Reference

- 200-1200A (breaker)
- 1200-2400A (feed thru)
- 1200 thru-bus rating
- UL Standard #67
- UL file #E27100
- AIC rating (65K and 100K)
- Voltage:
 - Three Phase 240V AC max
- All swing latches and rivets are stainless steel
- NEMA 3R (outdoor)
- G90 galvanized steel
- ANSI 61 paint

Power Mod

Type WBT Feed Thru Tap Box with Horizontal Bus Breaker

Connects via lugs.

Lug kits not included. Lug kits must be ordered separately per module.

Refer to pages 92-93 for lug size options.

Not for use as service equipment.

3-phase, 4-wire SN, 240V AC Max.

Power Mod

Type BFT Main Feed Thru

BFT - Main Feed Thru Modules

The BFT is a main breaker module for the Power Mod group metering line up that has the ability to isolate power to side-mounted modules just like any other Power Mod main breaker module, but also contains feed-through lugs that can be used to supply and isolate power vertically to downstream group metering line ups. This is a revolutionary product in cabled riser applications..

Features include:

- QuickSystem™ features
- Suitable for use as service entrance equipment
- Breaker protects power outgoing, vertically and horizontally
- 1200A meets EUSERC requirements
- Incoming and outgoing Power Mod thru bus
- Standard compression lug capability
- 65K AIC standard, 100K AIC available for all models
- Main breaker with broad ampacity ratings from 1200A to 2000A
- Field installable shunt trip

Main Feed Thru Quick Reference

- 200-1200A main bus rating (breaker)
- 1200-2400A horizontal bus rating (feed thru)
- 1200 thru-bus rating
- UL Standard #67
- UL file #E27100
- AIC rating (65K and 100K)
- Voltage: 240V AC max
- Available in single-phase and three-phase
- All swing latches and rivets are stainless steel
- NEMA Type 1 (indoor)
- G90 galvanized steel
- ANSI 61 paint
- All modules are bottom-feed only
- All modules have no hubs
- EUSERC drawing #347

Power Mod

Type BFT Main Feed Thru

Imagine a four-story building designed with a group metering line up on each floor. If the total load is between 1,200 and 2,000 amps, one BFT module can be placed on the first floor as the main for the first floor's meters and the service entrance main for the entire building using feed-through tapboxes on the second and third floors and a standard breaker main or WTB tapbox on the fourth floor.

Space savings

Cost savings on total installation

We listened:
Meets engineers' demand

One breaker protects entire building

One service disconnect

Power Mod

Type BFT Main Feed Thru

Another way to use the BFT

The BFT can be used to get around an obstruction such as a doorway, fire safety equipment, etc. The Main Feed Thru is grounded for service entrance applications from the factory but the bond can be removed for non-SER applications.

BFT Lug Kits

Lug kits to use with the BFT

		1 Phase	3 Phase	No. Wires/ Phase	Max CU wire size (KCMIL)	Max AL wire size (KCMIL)

Power Mod

Type WS Standard Switch Mains

Standard Switch Mains

Standard switch modules (type WS) are designed for flexibility, space savings, and durability.

Features include:

- QuickSystem™ features
- Standard compression lug capability
- Invertibility: 400-800 Amp devices can be rotated to accommodate the desired incoming feed direction
- 750 kcmil AL wire options for most models
- 100K AIC standard for all models
- Class T fuse provisions
- Front mounted handle – removes the need for spacers on the side
- Broad ampacity ratings up to 1200 Amps

Standard Switch Mains quick reference

- 200-1200A
- 1200A thru-bus
- UL Standard # UL98
- UL file #E25506
- AIC rating (100k AIC)
- Voltage:
 - Single phase 120/240V AC max
 - Three phase 240V AC max
- All swing latches and rivets are stainless steel
- NEMA 3R rated
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.

① Dimensions shown are representative of outside
box dimensions and do not include allowances for
mounting bumps, endwalls, covers, hubs, or hardware
protrusions. Dimensions are subject to change.

② Additional lead time required. Contact sales office for
details. Fusible pull-out switch.

③ Lugs not included. Refer to pages 92-93 for lug size options.
NEMA II stud pattern compression lugs must be installed by
user or utility.

④ Module is invertible – rotate device to point hub openings
to appropriate feed direction.

⑤ 500 kcmil max wire range size.

⑥ Fuses not included.

⑦ Device uses a molded case switch (looks like a breaker).
Class T fuses must be installed in conjunction with the
molded case switch for proper operation.

⑧ Depending on installation details and adjacent product, a
WSP spacer module may be required to provide enough
clearance for hinges/latches. Contact your local sales person
for support

Power Mod

Type WES Switch-Pullbox Combinations

Switch-Pullbox Combinations

EUSERC - compliant switch-pullbox combination modules (type WES) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.

Features include:

- QuickSystem™ features
- Factory installed NEMA II studs
- Broad ampacity ratings up to 1200 Amps
- 750kcmil AL wire options
- 100K AIC standard for all models
- Removable blank bottom endwall
- Front mounted handle - removes the need for spacers on the side
- Class T fuse provisions
- Large removable ground wire trough with generous space for grounding conductors
- Extra ground lugs in each device

Switch-Pullbox Combinations quick reference

Power Mod

Type WXS Switch Units

Cross Bus Switch modules

Cross Bus switch modules (type WXS) offer two distinct functions: first they can be used to connect Siemens Sentron Busway to a Power Mod line-up. Second they can be utilized to offer lower service disconnect ampacities or unique configurations where an incoming tap box is preferred.

Features include:

- QuickSystem™ features
- Incoming and outgoing bus connections (right to left or left to right)
- Standardized connection points to Siemens Sentron Busway
- 100K AIC standard for all models
- Externally accessible switch handle with padlock capability
- Class T fuse provisions
- Invertibility: Devices must be installed with line and load side in correct order

Power Mod

Type WTB Standard Tap boxes

Standard Tap boxes

Standard tap box modules (type WTB) are designed for versatility, space savings, and flexibility.

Features include:

- QuickSystem™ features
- Standard compression lug capability
- Invertibility: some devices can be rotated to accommodate the desired incoming feed direction (1600 Amps and lower)
- 750 kcmil AL wire options for most models
- 100K AIC standard for all models
- Broad ampacity ratings from 400 to 2400 Amps
- Line and load capability- service entrance and sub feed rated

Restrictions for 1600-2400amp type WTB Power Mod Tap Boxes:

When the 1600, 2000, or 2400A tap boxes are used as service entrance equipment (fed directly from utility transformer) or when the supply originates from a Class L fuse or Siemens WL circuit breaker there are restrictions on the use of an additional down-stream (thru-bus connected) WTB, WTB, WET, or WT type Power Mod tap boxes. In these instances a type "WXB" module must be used as protection for the downstream tap box. box (placed between the incoming WTB tap box and the downstream outgoing tap box). This restriction does **NOT** apply if the tap box is fed from a Siemens Sentron or VL series molded case circuit breaker. Note that the maximum amperage for a Siemens Sentron circuit breaker is 2,000A.

Power Mod

Type WTB Standard Tap boxes

⚠ Restrictions for 1600-2400amp type WTB Power Mod Tap Boxes: ⚠

When the 1600, 2000, or 2400amp tap boxes are used as service entrance equipment (fed directly from utility transformer) or when the supply originates from a Class L fuse or Siemens WL circuit breaker there are restrictions on the use of an additional down-stream (thru-bus connected) WTB, WTB, WET, or WT type Power Mod tap boxes. In these instances a type "WXB" module must be used as protection for the downstream tap box. box (placed between the incoming WTB tap box and the downstream outgoing tap box). This restriction does NOT apply if the tap box is fed from a Siemens Sentron or VL series molded case circuit breaker. Note that the maximum amperage for a Siemens Sentron circuit breaker is 2,000A.

Suitable for use as service equipment.
Certain conditions may apply. See wiring diagram for details.

Lugs not included.
NEMA II Stud
Pattern lugs must be
installed by user or
utility.

① Dimensions shown are representative of outside box dimensions and do not include allowances for mounting bumps, endwalls, covers, hubs, or hardware protrusions. Dimensions are subject to change.

② Lugs not included. Refer to pages 92-93 for lug size options. 750 conductor size available NEMA II stud

pattern compression lugs must be installed by user or utility.

③ 1200 amp maximum feed per side, any unit over 1200A must be used as a center fed main.

④ Module is invertible- rotate device to point hub openings to appropriate feed direction.

⑤ QuickConnect not included. If used for load side application an additional coupler must be ordered.

⑥ Please see restriction note above.

⑦ Please see lug kit number LK18500N2C on pages 92-93. For use with 500kcmil ONLY.

⑧ Fits 2400amp models ONLY.

Power Mod

Type WET Tap box - Pullbox Combinations

Tap box – Pullbox Combinations

EUSERC – compliant Tap box – Pullbox Combination modules (type WET) offer EUSERC compatibility, a wider range of lug options, and extra space for pulling in conductors.

Features include:

- QuickSystem™ features
- Standard compression lug capability
- 750 kcmil AL wire options for most models
- 100K AIC standard for all models
- Broad ampacity ratings from 400 to 1200 Amps
- Removable bottom endwall

Tap box – Pullbox Combination quick reference

- 400-1200A
- 1200 Amp thru-bus rating
- UL Standard #'s UL67

Power Mod

Type WT Feed Thru Tap box

Feed Thru Tap box

Family (type WT), the Feed Thru Tap box features cable in cable out lugs. Valuable for use in mid rise and high rise projects.

Features include:

- QuickSystem features
- Standard compression lug capability
- 250kcmil Al wire options
- 100k AIC standard
- Removable bottom endwell

Feed Thru Tap box quick reference

- 400 - 2400A
- 1200A thru bus
- UL standard 67
- UL file no. E27100
- AIC rating (100k AIC)
- Voltage:
 - Single phase 120/240V AC max.
 - Three phase, 240V AC max
- All swing latches and rivets are stainless steel.
- NEMA 3R rated
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.
- Broad ampacity ratings from 400 to 2400 Amps

Restrictions for 1600-2400amp type WT Power Mod Pull-Thru Tap Boxes:

When the 1600, 2000, or 2400amp tap boxes are used as service entrance equipment (fed directly from utility transformer) or when the supply originates from a Class L fuse there are restrictions on the use of an additional down-stream (thru-bus connected) WTBN, WTB, WET, or WT type Power Mod tap boxes. In these instances a type "WXB" module must be used as protection for the downstream tap box (placed between the incoming WT tap box and the downstream outgoing tap box). See page 2-70 for an example. This restriction does **NOT** apply if the tap box is fed from a Siemens Sentron or VL series molded case circuit breaker. Note that the maximum amperage for a Siemens Sentron circuit breaker is 2,000A. Please note that Siemens type WL circuit breakers can NOT be used to feed WT Power Mod tap boxes.

Power Mod

Type WT Feed Thru Tap box

Restrictions for 1600-2400amp type WT Power Mod Pull-Thru Tap Boxes:

When the 1600, 2000, or 2400amp tap boxes are used as service entrance equipment (fed directly from utility transformer) or when the supply originates from a Class L fuse there are restrictions on the use of an additional down-stream (thru-bus connected) WTBN, WTB, WET, or WT type Power Mod tap boxes. In these instances a type "WXB" module must be used as protection for the downstream tap box (placed between the incoming WT tap box and the downstream outgoing tap box). See page 2-70 for an example. This restriction does NOT apply if the tap box is fed from a Siemens Sentron or VL series molded case circuit breaker. Note that the maximum amperage for a Siemens Sentron circuit breaker is 2,000A. Please note that Siemens type WL circuit breakers can NOT be used to feed WT Power Mod tap boxes.

Lug kits not included.

(2) Lug kits must be ordered separately per module.

Refer to pages 92-93 for lug size options.

Not suitable for use as service equipment.

Power Mod

Type WMM Residential Meter Stacks

Residential Meter Stacks

Power Mod's core offering of Residential Meter Stacks, type WMM, offers the widest product offering and flexibility in the industry. Each meter stack houses the QuickSystem™ features to maximize productivity and minimize labor costs. To aid in productivity and labor cost reductions our 225 Amp meter stacks feature a new breaker - the "QS". The QS breaker adds to the Siemens exclusive feature set on our new 225 Amp Residential Meter Stacks.

Benefits of the "QS" include:

- An exclusive 6 high 225 Amp meter stack at the same height as our 125 Amp meter stack - 225 to 125 conversion: No conversion kit needed.
- Single right hand bend wiring - saves time and wire
- 100K AIC offered from 100 up to 225 Amps

Siemens Residential Meter Stacks are packed with features inside and out: our exclusive knock out plate offers flexibility when pulling wires to the stack, new breaker supports keep breakers level and straight, moveable neutrals and grounds to save wire, and all of the QuickSystem features all designed with the contractor in mind.

Residential Meter Stacks quick reference

- 2-6 gang
- 125/225 Amp per position
- 1200 Amp thru-bus rating
- UL standard 67
- UL file no. E27100
- AIC rating (65k and 100k)

Type WML Lever Bypass Meter Stacks

Lever Bypass Meter Stacks

Lever Bypass meter stacks (type WML) are designed to meet the requirements of those utilities specifying lever bypass meter sockets for residential and commercial applications.

Features include:

- QuickSystem™ features^①
- High-quality, time-proven Talon HQ sockets
- A line of 3-phase 100 Amp meter stacks to minimize tenant main cost
- Removable back knockout plate to facilitate wiring
- 225 Amp capability in single and three phase designs
- Up to 4 positions with 225 Amp tenant mains, up to 2 positions with 400 Amp tenant mains
- All lever bypass stacks are ringless.

Lever Bypass quick reference

- 125A 2-6 position
- 100A/225A 1-4 position
- 400A 1-2 position
- 1200A thru-bus rating
- UL Standard # UL67
- UL file # E27100
- AIC rating (25K, 35K, 65K and 100K)
- Voltage
 - Single phase 120/240V AC max
 - Three in single phase out 208Y/120V AC
 - Three Phase 240V AC max
- All swing latches and rivets are stainless steel.
- Indoor = NEMA 1 rated
- Outdoor = NEMA 3R rated
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.

**QuickConnect™
Included**

^① QuickPhase™ is not applicable with non-field phaseable stacks (WML, 225A-400A, 3-phase-in/3-phase-out).

Fusible Switch Lever Bypass Meter Stacks

Fusible Switch Lever Bypass Meter stacks This Commercial Lever Bypass meter stacks (type WML) feature a 400 Amp - class T - fusible pull out assembly..

Features include:

- QuickSystem™ features
- High-quality, time proven Talon HQ sockets
- Removable back knockout plate to facilitate wiring
- Available in single and three phases designs
- Single position with 400amp tenant main
- All lever bypass stacks are ringless.

Lever Bypass With Fusible Switch Quick Reference:

- 400A 1 position
- 1200A thru bus rating
- UL Standard #UL67
- UL file #E27100
- AIC rating 100KAIC
- Voltage
 - Single phase 120/240V AC Max
 - Three phase in, single phase out 208Y/120V AC
 - Three Phase 240V AC Max
- All swing latches and rivets are stainless steel
- Outdoor = NEMA 3R rated
- Indoor = NEMA 1 rated
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.

Type WMLZF and WMLZ Utility Meter Stacks: Knockout Diagrams

Fusible Switch Lever Bypass Meter Stacks

The WMLZ and WMLZF lever bypass meter stacks are designed to allow the use of class T (400amp max) fuses ahead of all meter positions where the local serving utility may require it. WMLZF stacks feature a 400amp fusible pull out assembly which connects to a secondary 400amp thru bus that can feed downstream meter stacks. The WMLZ stacks include the secondary 400amp thru bus that can connect from the WMLZF meter stacks. The standard Power Mod 1200amp thru bus "passes thru" to feed downstream modules - the meter sockets in WMLZ and WMLZF do NOT connect directly to the 1200amp thru bus - only to the 400amp thru bus.

Features include:

- QuickSystem™ features
- High-quality, time-proven Talon HQ sockets
- 125 Amp capability for 3-phase in/single-phase out
- 3 to 6 positions in both the fused stack and the expansion stack
- 400 Amp class T fusible-pullout in WMLZF stacks
- Secondary 400 amp thru bus to supply power to downstream sockets

Xcel Residential Lever Bypass Quick Reference:

- 125A 3 – 6 position
- 1200A thru-bus rating
- 400A secondary thru-bus rating and vertical bus rating
- UL Standard # UL67
- UL file #E27100
- AIC rating (100K)
- Voltage -Three-phase in/ single-phase out 120/240V AC max
- All swing latches and rivets are stainless steel
- Outdoor = NEMA 3R rated
- Indoor = NEMA 1R rated
- G90 galvanized steel
- ANSI 61 paint
- Custom options available.

Accessories

Catalog No.	Description
ECWMLZFBUS	WMLZ's thru bussing attachment kit (contains 3 bus bars)
ECWMLZEP	End enclosure plate WMLZ's and WMLZF's
ECWMLZBP	Bottom enclosure plate WMLZ and WMLZF
ECWML10	10 inch WML replacement cover

* Every WMLZ comes with a ECWMLZFBUS

Power Mod

Applications: WMLZ/ WMLZF – Fusible Residential Lever Bypass Meter Stacks

Flow of Current

- 1 Cables land on a tap box and current enters Power Mod line up on the main Thru Bus.
- 2 Current is directed from the main thru bus down onto the WMLZF's vertical bus and into the 400 amp fuse pull out.
- 3 The current then goes up on the WMLZF's vertical bus to feed the sockets.
- 4 WMLZ's must be fed by a secondary thru bus from the WMLZF's
*Additional connections are required between the WMLZ and WMLZF.
- 5 The current then flows up from the secondary thru bus and on to the vertical bus to feed the sockets in the WMLZ's.
*More than one WMLZ can be fed from 1 WMLZF.
- 6 The main thru bus is used as a pass thru on the WMLZ's for any additional modules attached to the line up.
*Quick Connect MUST be used between every module to maintain the line ups Neutral bonding, even if there are no extra modules attached at the end of the line up.

Power Mod

Type WMT Test Block Bypass Meter Stacks

Test Block Bypass Meter Stacks

Commercial Test Block Bypass Meter Stacks (type WMT) are designed to meet the requirements of those utilities specifying test block bypass meter sockets for commercial applications in areas subscribing to the EUSERC standards.

Features include:

- QuickSystem™ features
- High-quality, time-proven Siemens SMM switch-board meter socket
- Removable back knockout plate to facilitate wiring
- 225 Amp capability in single and three phase designs
- Up to 3 positions with 225 Amp tenant mains
- Wiring flexibility - tenant mains require only a single bend
- Three phase input, single phase output modules
- In line wiring: side knockouts allow wiring for adjacent units to pass through

Test Block Bypass Quick Reference

- 225A 1-3 positions
- 1200A thru-bus rating
- UL Standard #'s UL67
- UL file # E27100
- AIC rating (100K)
- Voltage
 - 1 phase 120/240V AC Max
 - 3 phase in 1 phase out 120Y/208V AC Max
 - 3 phase 240V AC Max
- All swing latches and rivets are stainless steel.
- Outdoor= NEMA 3R rated
- Indoor= NEMA 1R rated
- G90 galvanized Steel
- ANSI 61 Paint
- EUSERC drawing #'s 312 and 353
- Custom options available.

Power Mod

Type WC House Power Module

WC Series House Power Module

Power Mod's patented WC family of house power modules offers the ability to combine power distribution to branch circuits within a module that is connected directly to the thru bus. This reduces wall space needed, decreases labor and material cost (for installing a separate panel), and simplifies the electrical distribution system.

Key Features of the WC family are:

- Ring or Ringless Covers (horn bypass available with ringless)
- Three or single phase thru bus with single phase output
- 20 space, 40 circuit 100K AIC rated interior
- Available subfeed breaker which can be used for large remote loads (such as elevators) or alternative energy inputs (solar)
- Removable knock out plate
- Load wires can exit out of the top, back, or bottom

The line of WC house power modules allow for un-precedented flexibility and savings. All of this while featuring the industry-leading QuickSystem that allows for the fastest install time.

Series House Power Module quick reference

- 1 Position, Single Phase Meter Socket
- 250 Amp maximum rating per device. Load center interior limited to 225 Amps max. 1200 Amp thru-bus rating
- UL standard 67
- UL file no. E27100
- AIC rating: 100k
- Voltage:

Power Mod

Type WCT Test Block Bypass House Power Module

WCT Series House Power Module

Power Mod's patented WCT (test-block bypass) family of house power modules offers the ability to combine power distribution to branch circuits within a module that is connected directly to the thru bus. This reduces wall space needed, decreases labor and material cost (for installing a separate panel), and simplifies the electrical distribution system.

Key Features of the WCT family are:

- Siemens SMM Switchboard ring-style meter socket
- Phasing:
 - Single phase thru bus with a single phase meter socket and 20 space 40 circuit PL Series copper interior
 - Three phase thru bus with a single phase meter socket (phased AC) and 20 space 40 circuit PL Series copper interior
 - Three phase thru bus with three phase meter socket and 24 space 42 circuit PL Series copper interior
- 100K AIC
- Available subfeed breaker which can be used for large remote loads (such as elevators) or alternative energy inputs (solar)
- Removable knock out plate
- Load wires can exit out of the top, back, or bottom

The line of WCT house power modules allow for un-precedented flexibility and savings. All of this while featuring the industry-leading QuickSystem that allows for the fastest install time.

Test Block Bypass Series House Power Module Quick Reference

- Siemens SMM Switchboard ring-style
- 1 position, Single Phase Meter Socket
- 250amp, maximum rating per device
- Load Center interior limited to 225amp max.
- 1200amp thru-bus rating
- UL standard #'s UL 67
- UL file # E270100
- AIC rating 100K
- Voltage
 - 1 phase 120/240V AC max
 - 3 phase 120/208V AC max
 - 3 phase 240/120V AC max
- All swing latches and rivets are stainless steel
- Outdoor= NEMA 3R rated
- Interiors:
 - 20 spaces/40 circuits single phase
 - 24 spaces/42 circuits 3 phase PL Series copper bus
- G90 galvanized steel
- ANSI 61 paint
- Optional subfeed or alternative energy input (solar) up to 125amps
- EUSERC drawing #'s 312 and 353
- Custom options available.

Power Mod

Type WSPD Surge Protection Modules

WSPD Surge Protection Modules

Surge protection modules for Power Mod (type WSPD) are thru-bus connected modules that allow the user to view surge status as well as access the SPD control panel without breaking the utility seal on the enclosure. An optional breaker disconnect is available to enable the end user to replace the SPD (surge protection device) without having to disconnect utility power to the Power Mod installation.

Features include:

- QuickSystem™ features
- 100, 200, 300, 400, 500kA ratings available
- External, vandal resistant and lockable clear cover over SPD control panel
- Single phase thru bus and three phase thru bus
- Optional breaker disconnect that opens phase and neutral to make SPD replacement quick and easy

Surge Protection Module quick reference

- 100-500 kA rating
- 1200amp thru-bus rating
- UL standard #67
- UL file # E27100
- AIC rating: 100K
- Voltage
 - Single phase 120/240V AC max
 - Three phase 240V AC max
- All swing latches and rivets are stainless steel
- NEMA 3R rated
- ANSI 61 paint
- Custom options available.

Uni-PAK

Uni-PAK Metering: Introduction

General Information

Siemens Uni-PAK Metering offers maximum flexibility and ease of installation to meet the service requirements of multiple position metering projects. The outdoor/indoor devices are available in two through six gang set-ups which consist of a pull section with main lugs or stud terminations, and 4/5 jaw meter sockets with tenant circuit breaker provisions.

Features include:

- Siemens exclusive 200 ampere/position feature the QS breaker for faster & easier installation
- Removable knock-out plate for back exit
- Mounting rail for wall hanging - Siemens Exclusive
- UL Listed for use with 60/75C degree wire
- Outdoor/indoor construction
- Overhead or underground service; load top, bottom or back

Standard Uni-Pak Quick Reference

- ANSI - Standard #C 12.7-1987
- NEMA - Standard #250-1985
- UL - File #E27100
- UL - Standard #50, 67,414
- Voltage 240V AC Maximum
- 125 amp or 200 amp Maximum per position
- 1000 Amps maximum bus
- 2-6 positions

Uni-PAK

Uni-PAK Metering: Introduction

Uni-PAK Construction

Sturdy Steel Base Pan
Provides reinforcing durable support for each tenant main breaker.

2 Pole up to 225A @100kAIC
Fits in 2 inch – compact width reduces enclosure size limiting total mounting space required.

Rigid Molded Side Wall
Provides reinforcing vertical support for each tenant main breaker.

Main Breaker Retainer
Ensures secure connection for breaker wiring.

125 amp breakers can go into 225 amp positions without conversion kits.

Barrel Lock Capable Covers
Accepts common utility barrel locks to protect against unauthorized usage.

Lockable Breaker Cover

1 Extra Neutral And Ground Termination

Handle
available on larger devices to make lifting the unit easier.

Line Lugs Factory Installed (WP, WEP, WPC)

Top And Bottom Exit

Uni-PAK Features and Benefits

Mounting Rail

Simplified mounting by using a separate rail to hang the device.

5Th Jaw Option

Located in 6 or 9 o'clock position. Factory or field installed

Horn Bypass Option

Factory or field installed.

Front Accessible Connections

All connections use similar hardware and use belleville washers for tight connections.

Ring Or Ringless Covers

Individual ring or ringless type meter covers. Ring to ringless kits available to make last minute cover changes for specified utility requirements.

Apartment No. Emboss

Provides convenience and organization.

Removable Back End KO Plate

Simplifies and speeds up pulling wire. Entire plate can be removed to allow ample space for wire. Knockouts in the plate can be removed before or after stack installation.

More Features

- 1) Large range of ampacities 200- 1000A
- 2) 125 amp continuous duty sockets feed plug-in tenant breakers through 125 Amps
- 3) 200 amp continuous duty sockets feed plug-in tenant breakers through 225 Amps
- 4) UL Listed for short circuit ratings up to 100,000 RMS symmetrical Amps at 240V AC
- 5) Lever Bypass models available
- 6) EUSERC compliant models available
- 7) 2 - 6 number of meter positions
- 8) Outdoor/indoor construction
- 9) Overhead or underground service; load top, bottom or back
- 10) Compact design for ease of handling and installation
- 11) All unmetered bus is barriered and sealable to prevent unauthorized access.
- 12) Electrodeposited paint provides uniform coverage for long-lasting protection and sharp appearance
- 13) Complies with the following industry standards
 - ANSI - Standard # C 12.7-1987
 - NEMA - Standard #250-1985
 - UL - File #E10703
 - UL - Standard#50, 67, 414

Rain Channel

Rotates out of the way for easy KO access

Uni-PAK

Uni-PAK Metering: WP Ring Style

Features

- Individual split covers
- Ring style meter construction
- UL Listed for 60 / 75°C conductors. See equipment markings for applications
- For small apartment buildings, small professional and commercial buildings
- Completely self-contained meter centers
- Two to six 125A and 225A sockets breaker positions
- Outdoor surface mounted enclosures
- Compact, pre-bussed, easy to handle, hang and wire
- Barried, sealable compartment for unmetered current-carrying parts
- Al/Cu lay-in lugs, except two position 125A units
- Top or bottom feed
- Bottom and rear branch wiring exits (Neutral and ground at bottom only)
- ANSI #61 light gray electrodeposited paint on G90 galvanized steel
- Field installable 5th jaw kit

Uni-PAK

Uni-PAK Metering: WEP Ringstyle EUSERC

Features

- Individual split covers
- UL Listed for 60 / 75°C conductors. See equipment markings for applications
- Completely self-contained meter centers
- Outdoor surface mounted enclosures
- Semi flush with applicable field installed kit
- Barrired, sealable compartment for unmetered current-carrying parts
- Al/Cu lay-in lugs, except two socket units
- Top or bottom feed
- Bottom and rear branch wiring exits (Neutral and ground at bottom only)
- Meets EUSERC specifications when NEMA stud kit and flushing ring (if required) is field added. Compression lugs, if required, are sold separately.

① Dimensions shown are representative of outside box dimensions and do not include allowances for mounting bumps, endwalls, covers, hubs, or hardware protrusions. Dimensions are subject to change.

② Please note the EUSERC standard currently only covers up to 600 amp devices. Please consult utility prior to installation.

③ Applies to EUSERC drawing #342.

④ Uni-PAK designed for EV car charger. Has separate meter for utility company to offer lower rate for power to EV charger (50A top position).

⑤ To be used with compression or mechanical lugs. Power Mod type LK_N2(E) lug kits can be used. View cutsheet for specific lug kit options.

Uni-PAK

Uni-PAK Metering: WPL Ringless Style, Lever Bypass

Features:

- Side mounted handles to help in lifting
- Provisions for one, two, or three incoming conductors per phase and neutral (lugs field installed)
- 225 amp branch tenant provisions @ 100,000 AIC
- Full line of 2-6 position devices
- Light and compact design
- Individual split cover
- UL Listed for 60/75 degrees C conductors. See equipment markings for applications
- For small apartment buildings, small professional and commercial buildings
- Completely self-contained meter centers
- Outdoor surface mounted enclosures
- Barrired, sealable compartment for unmetered current-carrying parts
- Top or bottom fed
- Bottom and rear branch wiring exits (Neutral and ground at bottom only)
- ANSI #61 light gray electrodeposited paint on G90 galvanized steel.

Power Mod

Lug Kits: Lug selector

How to use the Power Mod lug selector:

1. Select enclosure from top
2. Choose applicable wire size
3. Select number of conductors being run beside appropriate amperage and phase to find correct lug kit part number

Additional lug combinations may be used. Reference the lug chart on page 2-193 to determine the number of conductors per phase and conductor size as required.

Note that while some connector kits may physically fit, the maximum wire range of the connector may not meet UL required bending space. If a lug kit other than what is on the wiring diagram is used, it is up to the installer to ensure the installation is acceptable.

① Lug kits - Sentron mechanical breaker lugs
② Factory installed lugs

③ Lug landing pad must be ordered in addition to lug kit. Refer to page 94 for lug landing pad options. Not compatible with Skinny Mains.

④ WT tap boxes require 2 lug kits when used on feed thru applications.
⑤ Lug kits for 2400A WT and WTB tap boxes only.

Power Mod

Lug Kits: Lug selector

Lug kits are available to meet the growing demand for multiple wiring configurations using aluminum and copper conductors in today's market. Power Mod offers a variety of lug configurations for every breaker, switch, and tap box module. Lugs are factory installed on standard breaker modules 200A-1200A. Alternate lug kits options (including 750kcmil) are available.

A field installable compression lug landing pad is available as an accessory for standard breaker module 250A-1200A. Compression lug kits must be ordered in addition to the lug landing pad accessory. The lug landing pad accessory is not compatible with the skinny mains with dedicated feed directions.

Lug kits must be ordered separately for standard breaker modules 1400A-2000A.

All EUSERC breaker main, standard switch, EUSERC switch, standard tap box, and EUSERC tap box require lugs to be ordered separately and field installed.

Use the chart below to identify the proper lug kit based on the conductor size required.

For example, if you have (1) 1200 single phase tap box, and are running (3) 750 kcmil wires per phase, you would order (1) LK13750N2

Conduit Hubs

Catalog No.	Description
Type RX	
EC38594	3/4" Conduit Hub
EC38596	1" Conduit Hub
EC38597	1 1/4" Conduit Hub
EC38598	1 1/2" Conduit Hub
EC9747-1113	Adapter plate for HD/RX

Type HD	
EC56854[®]	2" Conduit Hub
EC56855[®]	2 1/2" Conduit Hub
EC56856	3" Conduit Hub
EC56857	3 1/2" Conduit Hub
EC56858	4" Conduit Hub
EC56933S	Closure Plate

Accessory	Catalog No.	Description
	QC1	QuickConnect 1-phase, 3-wire, 1200 Amp maximum.
	QC4	QuickConnect 3-phase, 4-wire, 1200 Amp maximum.
	LLP600[®]	Lug Landing Pad for 200-600 Amp Standard Breaker modules (WB) only.
	LLP1200[®]	Lug Landing Pad for 800-1200 Amp Standard Breaker modules (WB) only.
	WMMBK^①	Pass-thru bussing - for use with underground pull box (WMMB modules).
	WMEP	Plastic end enclosure plate for thru bussing.
	SRSS	Sealing ring - snap-on, stainless steel.
	SRSW	Sealing ring - screw type, stainless steel.
	SRSTD	Sealing ring - snap on, aluminum (comes standard).
	ECJS^③	Meter bypass jumper 4 AND 5 JAW - not for use with lever bypass. For temporary use ONLY. Only works with ECPP cover. 200A max. Comes with 2 jumpers.
	ECPP	Plastic Ring Style cover plate. May be used with ringless style cover in conjunction with ECJS.
	ECCP3	Plastic Ringless Style cover plate.

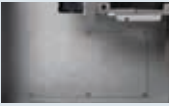

① One pass thru bussing supplied with each WMMB device.
 ② Item is a kit consisting of adapter plate and RX Type Hub

③ Required per 1-phase meter socket. Residential type ring and ringless - 200 Amp max. Meter cannot be installed while in use. Made for use with ECPP cover plate.

④ No kits are available for WEP2211.
 ⑤ Cannot be used for top-feed applications.

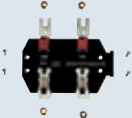

Power Mod and Uni-PAK

Multifamily Metering Accessories and Replacement Parts

Accessory	Catalog No.	Description
	ECMMRS	Power Mod mini ratchet set Includes: <ul style="list-style-type: none"> ■ 2" T-25 Torx Bit - Eases removal and re-installing of cover screws ■ 5/16" Magnetic Nut Setter - Eases the installation of Tap Boxes when QuickBolt assembly is required to be removed from one side. It can also be used to quickly install or reposition the fifth jaw. ■ 3/8" x 1/4" drive deep well socket - Eases connection of adjacent module using hardware provided.
	ECMFTAB	Mounting tabs or "ears" for top of Power Mod devices. Comes with 2 tabs.
	ECMFGN125	Kit for replacement or additional ground and neutral lugs for 125 Amp (W)MM residential stacks. Can also be used as the replacement or additional ground lug kit for 225 Amp (W)MM residential stacks.
	ECMFN225	Neutral lug kit for 225 Amp Residential stacks (type (W)MM Power Mod only).
	ECMFPK	Power Mod loose parts replacement kit. Includes: instruction sheet, (6) apartment number labels, (6) service disconnect labels, (4) 1/4-20 hex nuts, (4) #10-32 hex nuts, (4) 1/4-20 x 1/2 screws, (4) wing-nuts, (4) #10 flat washers, (4) #10 lock washers.
	ECMFCS	Cover screw replacement (quantity 10) for Power Mod and Uni-PAK devices.
	ECMMBC	Power Mod breaker cover replacement Type 3. Used only on 1200A WES mains, all WMK stacks, 100A 3-ph in/3-ph out (W)ML stacks and 400A (W)ML non-fused stacks.
	ECMMBCM	Power Mod plastic breaker cover for type WB and WEB main breaker units manufactured prior to 4/16/2018.
	ECBC	Breaker cover replacement for type (W)MM, (W)ML, WMT single phase meter stacks and series WP, WEP, WPL, and WPC Uni-PAK.
	ECMMKOP	Power Mod knock-out plate with knock-outs for type (W)MM Residential Stacks (not suitable for Uni-PAK). Attaches to back wall of unit.
	ECMMNKOP	Power Mod knock-out plate without knock-outs for Type (W)MM Residential Stacks (not suitable for Uni-Pak). This is a blank plate, ideal for contractors who want to cut their own holes in the back plate
	ECMLNKOP	Blank removable back plate for 125A (W)ML stacks (not suitable for Uni-PAK).

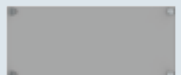

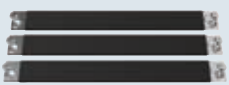

Power Mod and Uni-PAK

Multifamily Metering Accessories and Replacement Parts

Accessory	Catalog No.	Description
	ECMFWLCLIP	Rail/clip located on back of unit with wheels (Power Mod only).
	MMCLIP	Rail/clip that comes on back of unit, no wheels (Power Mod only).
	MMRAIL	12" Standard wall mounting rail (Power Mod or Uni-PAK).
	MMZR24	24" long mounting "Z" rail for wall mounting (Power Mod or Uni-PAK).
	MMZR36	36" long mounting "Z" rail for wall mounting (Power Mod or Uni-PAK).
	MMZR48	48" long mounting "Z" rail for wall mounting (Power Mod or Uni-PAK).
	MMZR60	60" long mounting "Z" rail for wall mounting (Power Mod or Uni-PAK).
	ECMFH	Horn bypass kit for field replacement or addition on ringless type (W)MM meter stacks and ringless series WP and WPC Uni-PAK.
	ECMF5	5th jaw replacement for Power Mod type (W)MM meter stacks and series WP, WEP, and WPC Uni-PAK.
	ECMT5	5th jaw Power Mod stack WMT. 1-ph in/1-ph out only.
	ECMF5i	Isolated 5th jaw. Allows for 5th jaw to be disconnected from the neutral while in place. For use on (W)MM and (W)MN stacks only.
	ECMFS	Meter socket replacement for Power Mod type (W)MM meter stacks and series WP, WEP, and WPC Uni-PAK.
	ECMFBM1	Breaker mounting replacement for 125 Amp Power Mod type (W)MM, (W)ML, WMT single phase meter stacks and series WP, WEP, WPL and WPC Uni-PAK.
	ECMFBM2	Breaker mounting replacement for 225 Amp Power Mod type (W)MM, (W)ML, WMT single phase meter stacks and series WP, WEP, WPL and WPC Uni-PAK.
	ECMFMC	Ringtype meter cover replacement for Power Mod type (W)MM Ringstyle residential meter stacks and WP, WEP, and WPC series ringstyle Uni-PAK. For 9" ring type.
	ECMFMC	Ringless meter cover replacement for Power Mod type (W)MM ringless residential meter stacks and WP and WPC series ringless Uni-PAK.
	ECMMRLCK	Power Mod and Uni-PAK ring to ringless cover conversion kit for type (W)MM meter stacks and WP series Uni-PAK.
	ECMMRCK	Power Mod and Uni-PAK ringless to ring cover conversion kit for type (W)MM meter stacks and WP series Uni-PAK. For 9" ring type.

Power Mod and Uni-PAK

Multifamily Metering Accessories and Replacement Parts

Accessory	Catalog No.	Description
	ECMFC	Bottom pull cover. Blank cover below the socket positions. For (W)MM Power Mod and WP, WEP, and WPC Uni-PAK.
	ECMFPS	Quick phase "Z" strap replacement for Power Mod type (W)MM meter stacks and series WP, WEP, and WPC Uni-PAK.
	ECWMLPS	Phase Straps for Lever bypass stacks. For use on 3-PH-In/1-PH-out, 125A, (W)ML stacks only. Only applicable to field phaseable units. Includes (2) line straps, (2) phase straps and (6) 1/4-20 hex nuts.
	ECMMFSP400	400A Power Mod metering switch main fuse bus replacement kit. Includes: bus plates, screws, hex nuts, washers and bolts (used to mount fuse in the module).
	ECMMFSP600	600A Power Mod metering switch main fuse bus replacement kit. Includes: bus plates, screws, hex nuts, washers and bolts (used to mount fuse in the module).
	ECMMFSP800	800A Power Mod metering switch main fuse bus replacement kit. Includes: bus plates, screws, hex nuts, washers and bolts (used to mount fuse in the module).
	ECAFL	(10) Arc flash labels.
	ECMMQRSCR	Power Mod QR and QJ 3-phase breaker mounting and strap screws. Kit contains (2) #10-32 x 2-7/16" screws and (3) 1/4-20 x 5/8" screws. For use on (W)ML and WMT Power Mod.
	ECMMGBE	Power Mod ground lug bar assembly kit. Adds 4 rows of NEMA stud kits to the ground bar. Can be used in bottom or top position. Includes 1 extension assembly and screws. Can be used on the following modules: WT_PU (1600-2400A), WTB (2000-2400A), WBT324X_(All), BFT (ALL).
	ECGLK3300	300 kcmil ground lug extension kit. Includes (3) lugs for ground. May be used on WB (up to 1200A), WBT, WTB and WT_PU (1600-2400A).
	ECGLK6300	300 kcmil ground lug extension kit. Includes (6) lugs for ground. May be used on WB (up to 1200A), WBT, WTB, WET and WT_PU (400-2400A). Included bonding strap is only necessary for the WB series.
	ECMFMC10	Ring-type meter cover for 10" opening. For (W)MN stacks only.
	ECWML10	Replacement 10" ringless meter socket cover for use on 125A (W)ML, (W)MLZ and (W)MLZF stacks that are single-phase out only.
	ECWMLC	Bottom pull cover. Replacement part only. Only to be used on 125A (W)ML.
	ECWMLZEP	Secondary cross bus side cover plate. Replacement part only. For use on fusible meter stacks (W)MLZ(F).
	ECWMLZBP	Bottom removable endwall plate for (W)MLZ(F) stacks. Replacement part only.
	ECWMLZFBUS	Secondary cross bus assembly for (W)MLZ(F) stacks. These 3 bus bars are installed toward the base of the (W)MLZ stack to create a secondary bus connection to an adjacent (W)MLZF or (W)MLZ stack. Includes (3) bus bars and (6) hex nuts. Replacement part only.

Replacement Breaker Covers

These replacement metal covers (breaker side) are for WML, WMT and other three-phase modules manufactured prior to February 5, 2016. Prior to this date, these stacks were made to be only compatible with the QJ breaker. The QR breaker replaced the QJ breaker, so for these modules to be compatible with the QR breaker they will need a cover conversion kit from the table below. Stacks manufactured after February 5, 2016 will accept both QJ and QR breakers without needing a cover kit.

Accessory	Catalog No.①	Description
	ECWML3BC1	RX breaker side metal door cover for WML13225RJ accepts QR and QJ breaker.
	ECWML3BC2	RX breaker side metal door cover for WML23225RJ accepts QR and QJ breaker.
	ECWML3BC3	RX breaker side metal door cover for WML33225RJ accepts QR and QJ breaker.
	ECWML3BC4	RX breaker side metal door cover for WML43225RJ accepts QR and QJ breaker.
	ECML3BC1	RX breaker side metal door cover for ML13225RJ accepts QR and QJ breaker.
	ECML3BC2	RX breaker side metal door cover for ML23225RJ accepts QR and QJ breaker.
	ECML3BC3	RX breaker side metal door cover for ML33225RJ accepts QR and QJ breaker.
	ECML3BC4	RX breaker side metal door cover for ML43225RJ accepts QR and QJ breaker.
	ECW3MMUBC1	RX breaker side metal door cover for W3MM1200U accepts QR and QJ breaker.
	ECW3MMUBC2	RX breaker side metal door cover for W3MM2200U accepts QR and QJ breaker.
	ECW3MMUBC3	RX breaker side metal door cover for W3MM3200U accepts QR and QJ breaker.
	ECW3MMUBC4	RX breaker side metal door cover for W3MM4200U accepts QR and QJ breaker.
	ECW3MMBC1	RX breaker side metal door cover for W3MM1200 accepts QR and QJ breaker.
	ECW3MMBC2	RX breaker side metal door cover for W3MM2200 accepts QR and QJ breaker.
	ECW3MMBC3	RX breaker side metal door cover for W3MM3200 accepts QR and QJ breaker.
	ECW3MMBC4	RX breaker side metal door cover for W3MM4200 accepts QR and QJ breaker.
	ECWMT3BC1	RX breaker side metal door cover for WMT13225J accepts QR and QJ breaker.
	ECWMT3BC2	RX breaker side metal door cover for WMT23225J accepts QR and QJ breaker.
	ECWMT3BC3	RX breaker side metal door cover for WMT33225J accepts QR and QJ breaker.
	ECMT3BC1	RX breaker side metal door cover for MT13225J accepts QR and QJ breaker.
	ECMT3BC2	RX breaker side metal door cover for MT23225J accepts QR and QJ breaker.
	ECMT3BC3	RX breaker side metal door cover for MT33225J accepts QR and QJ breaker.
	ECW3USSBC1	RX breaker side metal door cover for W3MM1225USS accepts QR and QJ breaker.
	ECW3USSBC2	RX breaker side metal door cover for W3MM2225USS accepts QR and QJ breaker.
	ECW3USSBC3	RX breaker side metal door cover for W3MM3225USS accepts QR and QJ breaker.

① QP Breakers will fit in 225A WMM, WML, and WMT meter stacks.

② QS series rates with Murray circuit breakers.

③ Breaker selection (when applied to Uni-PAK) applies to WP, WPC, WEP, WPL, Uni-PAK metering only. QS breakers will not fit in SP or MP series.

Tenant Circuit Breakers

Power Mod's core offering of residential Meter Stacks, type WMM, offers the widest product offering and flexibility in the industry. Each meter stack houses the QuickSystem features to maximize productivity and minimize labor costs. To further simplify installation, our 225 Amp meter stacks feature the QS breaker. The QS breaker adds to the Siemens exclusive feature set in our Power Mod product line. Benefits and part numbers include:

- An exclusive side wired design saves wiring space and eliminates difficult "S bends"
- No need for costly filler plates — QS 225 Amp breaker takes the same space as standard 100 Amp QPs
- Single right hand bend wiring - saves time and wire
- Provides 100K AIC flexibility from 100 up to 225 Amps
- 10K to 100K AIC Series Rating

Breaker Type	QS	QSH	QSHH	HQS	HQSH

Cover Plate

ECPP	Plastic Ring Style®
ECCP3	Plastic Ringless Style

Filler Plates

ECQF3	1" Filler Plate
ECCP3U®	4" to 2" Filler Plate

① Not for use on lever bypass units.

② Order NSK600 and PLK600 kits for use with 800 Amp PAK. CU Cable only approved with 800A device.

③ Use Adapter plate with RX hubs for PAK units.

④ These items made of Adapter plate and equivalent RX hub.

⑤ Lug kits should be chosen based on the wire size being run to the unit. Wire should be sized according to the National Electrical Code. Lugs are sold separately. On 400-600A applications, a total of 3 lugs are required to wire the line side of the device. Lugs sold in packs of 2 pieces.

⑥ To be used with compression or mechanical lugs. Power Mod type LK_N2(E) lug kits can be used. View cutsheet for specific lug kit options.

OBSOLETE Modular Metering Replacement Parts Kits

Selection

- All kits come with appropriate hardware and instruction sheet for safe installation
- Packages are stocked in specified Quantities and cannot be substituted or changed

Part Number	Description	Contents
Breaker Covers		
GMBC1 ^{①②}	Group Metering Breaker Cover - 125Amp Positions	One Top and bottom black plastic breaker cover piece, 1 gasket, and a locking clip
GMBC2 ^{①②}	Group Metering Breaker Cover - 200Amp Positions	Top and bottom black plastic breaker cover pieces, gasket, and locking clip
Meter Covers		
MMCVR1 ^①	Modular Metering Covers 125A Ring Style	1 Ringstyle meter cover welded with support brackets and painted
MMCVR1R ^①	Modular Metering Covers 125A Ringless	1 Ringless style meter cover welded with support brackets and painted
MMCVR2 ^①	Modular Metering Covers 200A Ring Style	1 Ringstyle meter cover welded with support brackets and painted
MMCVR2R ^①	Modular Metering Covers 200A Ringless	1 Ringless style meter cover welded with support brackets and painted
MMCVRLOW	Modular Metering Bottom Cover (neutral access cover)	Smallest (bottom) cover on meter stack and screw included
MMCVRSCR	Modular Metering Cover Screws	Bag of 10 screws
PAKMCVRR ^②	Tenant cover for Ring Style Uni-Pak Meter Center	1 Ringstyle meter cover welded with support brackets and painted
PAKMCVRL ^②	Tenant cover for RingLess Uni-Pak Meter Center	1 Ringless style meter cover welded with support brackets and painted
Meter Socket/Breaker Mounting		
MMBMT1 ^①	Modular Metering Breaker Mounting S/A 125A	Breaker Mounting assembly includes provision for 125 or 200A breaker
MMBMT2 ^①	Modular Metering Breaker Mounting S/A 200A	
MMSCK1 ^{①②}	Modular Metering Meter Socket Assembly 125A	Meter Socket assembly includes jaws, straps, and hardware – see picture above
MMSCK2 ^{①②}	Modular Metering Meter Socket Assembly 200A	
MMSRPK ^③	Replacement parts for 125A pre-1991 modular metering (see tip below)	1 red plastic base, 4 jaws and connecting line straps

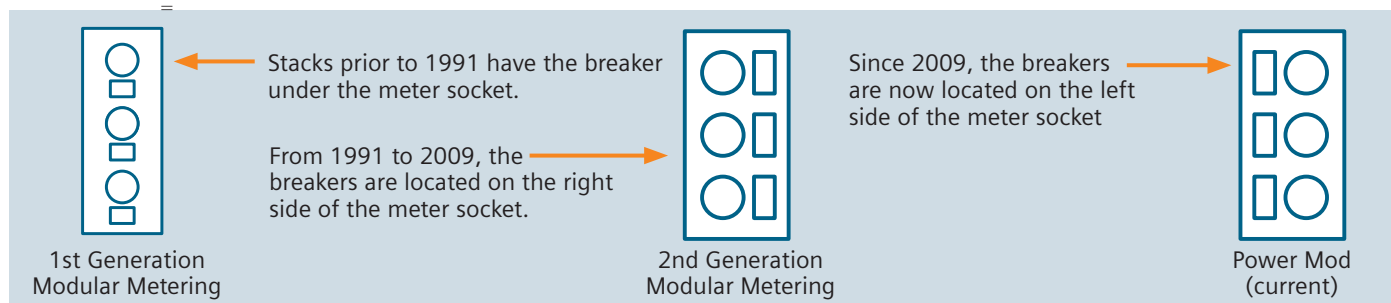

Loose Parts Kits^①

MMPK11	Modular Metering Loose Parts Kit 125A 1 PHASE	All loose screw bags, labels, instruction sheet and aluminum sealing ring (No SBJ)
MMPK13	Modular Metering Loose Parts Kit 125A 3 PHASE	
MMPK21	Modular Metering Loose Parts Kit 200A 1 PHASE	
MMPK23	Modular Metering Loose Parts Kit 200A 3 PHASE	

- ① Fits modular metering made from 1992-2009 and PAK devices from 1992-2003.
- ② Fits PAK devices from 2004-2011
- ③ Fits 125A modular metering and PAK made from 1980-1991 ONLY. Not compatible with EUSERC style PAK (EUSERC versions contain suffix W/WF). No other replacement parts available.

⑤ WML and WMT 225 amp, 3 phase

⑥ WML and WMK 400 amp, single and 3 phase

⑦ WMK 600 amp, single and 3 phase

What is NEC® 240.87?

NEC 240.87 requires a means of reducing the arc energy for any circuit breaker that can be set at 1200A and above. The code has been revised for 2017 with a new list of approved methods to implement arc energy reduction. An overview of these methods is provided below. For further information regarding the code, please reference document no. PDFL-NECQA-0217, available in the download center (usa.siemens.com/downloadcenter).

Methods to reduce clearing time:

1. Zone-selective interlocking
2. Differential relaying
3. Energy-reducing maintenance switching with local status indicator
4. Energy-reducing active arc flash mitigation system
5. An instantaneous trip setting that is less than the available arcing current (2017)
6. An instantaneous override that is less than the available arcing current (2017)
7. An approved equivalent means

Power Mod

Understanding 2017 NEC 240.87 Arc Energy Reduction

Electronic Trip Unit (ETU) with DAS®

The Siemens Power Mod product line now offers main breaker modules with Dynamic Arc Sentry (DAS). This DAS solution complies with NEC240.87 by providing an energy-reducing maintenance switch with local status indication. These modules incorporate the new Sentron Sensitrip IV, SND-Frame, solid state breaker and are identified as WB(M) and WEB(M) units.

Modules with DAS will feature a blue, illuminated push-button under a clear cover mounted on the enclosure. To initiate maintenance mode – lowering the instantaneous settings – the user lifts the clear cover and presses the button. The button will illuminate – providing status indication – when the breaker has successfully transitioned into maintenance mode. The breaker will stay in maintenance mode until the push-button is depressed again and the light turns off.

Another benefit of the Siemens DAS solution is that the status indication may be clearly seen from across the room and in a variety of environments. Furthermore, the separate breaker cover is now larger than prior models, which allows the breaker handle extension to be stored inside the cover for easy access.

Power Mod offers multiple solutions to address NEC 240.87

Speak to a Siemens representative for more details.

Power Mod

Power Mod™ Express Stocking Program

Welcome to the Power Mod Express program. Placing an order as Express will ensure shipping within 3 to 5 business days of the Power Mod units*. Orders should be placed through COMPAS. The list includes many Catalog No.s including mains, meter stacks, accessories and lug kits.

In order to qualify for an Express order:

- Must be ordered through COMPAS, with the "Express" box checked
- All units in the order need to be on the below list.
- Lug kits are the only exception and will not impact the Express status of the order.
- All order quantities per Catalog No. must be less than or equal to 5 units**
- If the order has Power Mod items outside the list below the overall order will receive a standard 10 day lead time.

Pick any item on this list, and we will ensure it gets shipped within 3 to 5 business days.

**Maximum quantity of 5 units per Catalog No.

Lugs

*Any and all lug kits can be shipped through the Express program.

These kits include Catalog No.s such as LK12500N2, LK32500N2, LK33500N2, LK34500N2, and more.

*Express items are in stock at a 3rd party warehouse. Stock will not be visible in Industry Mall.

**This is because stock levels are set to 5 units per Catalog No., this does not apply to accessories or lug kits.

Power Mod

Power Mod™ Express Stocking Program

Siemens is excited to make available our very flexible residential meter stacks. Because many of our products are able to be field-modified to meet your needs, we have laid out which of our products you can express ship and modify on your own to meet your needs.

Instructions:

1. Find the product you desire in the second column.
2. Order the corresponding product in the first column.
3. Order the corresponding accessories indicated in the fourth column
4. Once your product arrives, perform the slight modification needed (noted in the fourth column).

WMM Tenant Modules

Catalog No. to Purchase	Field-Modified Unit	Description	Instructions on how to Modify*

	WMM42225RJB	WMM 225A 4G 3PH IN 1PH OUT RNGLES HB 5J	Add Bypass via Kit (ECMFH)
WMM51125	WMM51125	WMM 125A 5G 1PH IN/OUT RING TYPE	No modification needed
	WMM51125J	WMM 125A 5G 1PH IN/OUT RING TYPE 5J	Add 5th Jaw via Kit (ECMF5)
WMM51125R	WMM51125R	WMM 125A 5G 1PH IN/OUT RINGLESS	No modification needed
	WMM51125RB	WMM 125A 5G 1PH IN/OUT RINGLESS HB	Add Bypass via Kit (ECMFH)
	WMM51125RJ	WMM 125A 5G 1PH IN/OUT RINGLESS 5J	Add 5th Jaw via Kit (ECMF5)
	WMM51125RJB	WMM 125A 5G 1PH IN/OUT RINGLESS HB 5J	Add 5th Jaw via Kit (ECMF5) & Bypass via kit (ECMFH)
WMM52125J	WMM52125J	WMM 125A 5G 3PH IN 1PH OUT RING TYPE 5J	No modification needed
WMM52125RJ	WMM52125RJ	WMM 125A 5G 3PH IN 1PH OUT RINGLESS 5J	No modification needed
	WMM52125RJB	WMM 125A 5G 3PH IN 1PH OUT RNGLES HB 5J	Add Bypass via Kit (ECMFH)
WMM52225J	WMM52225J	WMM 225A 5G 3PH IN 1PH OUT RING TYPE 5J	No modification needed
WMM52225RJ	WMM52225RJ	WMM 225A 5G 3PH IN 1PH OUT RINGLESS 5J	No modification needed
	WMM52225RJB	WMM 225A 5G 3PH IN 1PH OUT RNGLES HB 5J	Add Bypass via Kit (ECMFH)
WMM62125J	WMM62125J	WMM 125A 6G 3PH IN 1PH OUT RING TYPE 5J	No modification needed
WMM62125RJ	WMM62125RJ	WMM 125A 6G 3PH IN 1PH OUT RINGLESS 5J	No modification needed
	WMM62125RJB	WMM 125A 6G 3PH IN 1PH OUT RNGLES HB 5J	Add Bypass via Kit (ECMFH)

*If ordering a field modification accessory kit for adding a 5th jaw (ECMF5) or a horn bypass (ECMFH), these kits will be shipped separately from a different Siemens facility.

Power Mod is Proven to Save Time

It is not a secret that Siemens Power Mod is easy to install and saves contractors time. To quantify this we had a third party organization conduct a Time & Motion Study in order to identify how much time the Siemens Power Mod product saves the contractor compared to the competitors. The findings were shocking. The study found that Power Mod product could be installed 32-43% faster than the competitor's products. This averages out to an average time savings of 37.5%. Read the study for yourself, scan the QR code or visit this site ➡ usa.siemens.com/powermod-timestudy

Estimate Your Savings – *fill in the blanks*

Average number of labor hours needed to install one meter center lineup:		_____
Average cost per labor hour:	x	_____
Total labor cost per lineup	=	_____
Average number of lineups per job:	x	_____
Total labor cost per job	=	_____
Percent of average cost savings:	x	_____ .375
Your Total Average Job Savings	=	<input type="text"/>

Example:

Average number of labor hours needed to install one meter center lineup:		_____ 10
Average cost per labor hour:	x	_____ \$70
Total labor cost per lineup	=	_____ \$700
Average number of lineups per job:	x	_____ 12
Total labor cost per job	=	_____ \$8,400
Percent of average cost savings:	x	_____ .375
Your Total Average Job Savings	=	<input type="text" value="\$3,150"/>
