

E-Lume ICE PAR lamps have a frosted lens which provides an evenly distributed light output that mimics the familiar look of STANDARD's halogen ICE PAR lamps. This is ideal to avoid hotspots on a surface or dark zones in a room. Their dimmable feature will set the mood for any occasion. LED ICE lamps are perfect for both residential and commercial applications, including hospitality and restaurant industries where smooth and even light is needed.

<sup>1</sup> Life rating based on L70 lumen depreciation design criteria. Average life of lamps that have been approved for ENERGY STAR early submission or complete submission can vary. ENERGY STAR early submission dictates that manufacturers can only claim 25 000 hour life with 3 000 hour actual life test data, 6 000 hour LM-80 data and in-situ temperature measurements. Once a product has been fully qualified, manufacturers may increase the lifetime of a product by demonstrating full compliance with the ENERGY STAR criteria at the new lifetime with Lumen Maintenance at the minimum required test period.

<sup>2</sup> Typical lumens +/- 10%

# LED PAR ICE Lamps

### **Avoid hotspots**

Frosted lens for a soft no glare illumination.

### **Evenly distributed light**

The ICE finish paired with a wide beam angle ensures a diffused light to eliminate dark zones.
